Reagan Reinforces Firm Defense Stand Toward Kremlin

By Phil Gailey w York Times Service

LOS ANGELES - President Ronald Reagan, in a speech that ning posture toward the Soviet Union, has strongly defended plans to develop a defensive weapons system in outer space. His remarks Thursday were a

strong reaffirmation of his commitment to the weapons project, and they came after a week of sharp exchanges and other developments that have appeared to have further chilled relations between the United States and the Soviet Union. In his first speech outside the thite House since his operation for colon cancer on July 13. Mr. Reagan said the proposed Strategic Defense Initiative, widely known as "star wars," offered "us a way out of the nuclear dilemma that has confounded mankind for four de-

Noting that critics had called the project "unfeasible and a waste of money," the president said, "Well, if that's true, why are the Soviets so upset about it? As a matter of fact, why are they investing so many rubles of their own in the same

Speaking to a fund-raising din-ner for the California Republican Party, Mr. Reagan said administration policy on Central America had "turned around a desperate sima-tion in these last four and a half

He added: "One of the proudest accomplishments of this administration has happened slowly and quietly, with little recognition When we first got to Washington, the question on everyone's lips was, Will El Salvador fall to the Com-

Now, the president said, "the question is, Will democracy win in Al Nicarauga? And tomorrow the question will be. 'How soon?' Mr. Reagan's remarks came two

days after the administration antions, the United States would proceed with plans for the first U.S. test of an anti-satellite weapon.

The Soviet Union has objected ers. to the test, contending that develwas related to the Strategic De-fense Initiative and would lead to of which he is spending at his ranch the militarization of outer space.

The anti-satellite test is not diectly associated with the Strategic Defense Initiative. But because the two weapons programs involve similar concepts and hardware, the anti-satellite program has become an element in the debate over the

Strategic Defense Initiative.
These and other recent developments have raised questions about whether the administration is toughening its public posture to-ward the Soviet Union before the planned meeting between Mr. Rea-gan and Mikhail S. Gorbachev, the Soviet leader, in Geneva in Novem-

In a speech Monday, Robert C. McFarlane, the White House national security adviser, said there could be no fundamental changes in relations between Washington and Moscow until the Soviet Union changed its ways and attitude.

Then, on Wednesday, the admin-istration accused the Soviet security police of using a potentially haz-ardous chemical dust on Americans in Moscow to track their movements and contacts.

Reagan in High Spirits

The president appeared in good health and high spirits as he gave a 17-minute speech, interspersed with typical one-liners, at the \$1,000-a-plate Republican fund-raising dinner, The Washington Post reported from Los Angeles.

Mr. Reagan joked about the op-eration in which a cancerous tumor was removed from his colon. He said he had received many cards and letters, including one that said; "I was very disappointed to hear that the doctors took two feet out of your inner workings. How did those two feet get in there?"

The president has been out of public view most of the time since he returned to the White House on July 20, after a week in the hospital. He held a state dinner in the White House for President Li Xiannian of China the following

contending that develin the has been virtually invisible an anti-satellite weapon since he arrived in California on near Santa Barbara.

Izvestia Sees Threat to Ties In Chemical Spy Charges

Compiled by Our Staff From Dispatches MOSCOW - The Soviet news media launched a sharp counterattack Friday against U.S. charges that Americans here had been

tracked using a chemical dust. Reports in two Soviet newspapers said the accusations seemed to be aimed at blocking an improvement in U.S.-Soviet relations.

But a State Department spokesman said Washington would contime doing business as usual with

Moscow despite the furor. An article in Izvestia blamed "malignant slanderers" for making the charges, which it said were part of a CIA offensive. "It looks as if someone in the U.S.A. does not want Soviet-American relations to

get on the road to normalization," But in Washington, Charles E. Redman, a State Department spokesman, said: President Rea-gan has made clear he wants to chart a course for the future that will allow us to resolve concrete problems and put U.S.-Soviet relations on a sounder footing. We in-tend to pursue this course. We nev-

The State of

er expected it to be easy." He and other U.S. officials stood their claims that the Soviet Union was using a little-known chemical to trace Americans who

touched objects that had been dust-

ed with the substance. Very little is known about the powder, nitrophenyl pentadiene aldehyde, or NPPD. But some scientists said Friday it seemed very unlikely that anyone had been harmed by it.
In a briefing Friday in Moscow,

U.S. Embassy official said that NPPD had apparently been used since 1976, but it was still unclear exactly how it was used.

The official, who insisted he not be named, said U.S. scientists can detect the chemical only under laboratory conditions with an expensive instrument called a mass spec-

Asked how it could then be of value in tracing people in a crowded city, he said the United States believed the Russians may have a cheaper way of detecting NPPD's

He said the U.S. Embassy does not have a mass spectrometer, so it would be "logical to conclude" the chemical was first found outside

the Soviet Union. He said key embassy personne were not aware of the chemical's existence until last weekend. A senior State Department official said the United States would (Continued on Page 3, Col. 7)

of their missing children. By Friday police opened fire on a crowd in the small town on the eastern Cape of Aliwal North.

The deaths, coupled with new outbreaks in black townships outside Cape Town, were further evidence that the government's nearly five-week-old state of emergency had yet to quell the political violence that has claimed more than

625 lives in the past year.

The roundup of children in Soweto started Thursday with about 300 arrests of students caught outside school grounds by soldiers. Witnesses said some of the children were beaten with whips that are issued to soldiers and police. Most of them, including the youngest group, spent the night in police jails, according to parents interviewed Friday.

The troops were enforcing antiboycott regulations issued last week that make it a crime for students to be off school g ing school hours. The rules, promulgated under the government's sweeping emergency decree, are an attempt to crush what has been one of the main weapons of young black activists seeking to demon-strate opposition to white minority rule and the government's apart-

heid system. The white police commander for Soweto, Brigadier Jan Coetzee, was quoted in The Sowetan newspaper as saying "We are cracking down. We will not allow 5,000 stupid students to disregard law and order in Soweto and in South Africa."

The newspaper also quoted Brigadier Coetzee as saying it was quite possible that as many as 50 pupils between the ages of 7 and 10 had been arrested. Hundreds more students were

picked up Friday, many of them at Fidelitas High School in the township of Diepkloof. They came and took us right out of class," said Viviens Davis, 16, who was one of those held for about five hours at the station.

'They didn't tell us anything, they just made us move into trucks." The police spokesman said students under 13 were released without charge while others were charged under the emergency regulations and released to their parents' custody. They are to appear in

court early next week. Aliwai North, located in South Africa's politically conservative interior, was another community that had managed to skirt the unrest until recently. But Thursday night police opened fire on a crowd that

Counterspy Flees East; Bonn Concedes Harm

By William Drozdiak Washington Post Service

BONN - East Germany announced Friday that a leading Vest German counterespionage official had defected, confirming what diplomats here described as a spy scandal that could seriously undermine Western intelligence agen-

The East German news agency ADN said that Hans Joachim Tiedge, 48, who disappeared last weekend amid mounting evidence of a major spy ring in Bonn, had asked for political asylum. It said his request was under review.

The news agency said that the defection proved East Germany's superiority over West Germany in intelligence work. East Berlin newspapers said Thursday that 168 West German agents had been captured in the last 18 months.

West Germany conceded Friday that Mr. Tiedge's defection would cause enormous damage to the country's security. He had worked in counterintelligence for nearly 20 years, and had risen to become third in command of counterintelligence service known as the Office for Protection of the Constitution. Diplomats said that Mr. Tiedge's

high rank and broad access to sensitive information could compromise the work of the intelligence services of other Western allies, inchuding the United States, and could even impair certain allied

[The United States will consult Bonn to assess the damage caused by Mr. Tiedge's defection, the State Department said Friday, Reuters reported from Washington.]

For the past four years Mr. Tiedge was in charge of tracking East German spies. Security officials said he was entrusted with the identities of many Western agents and their contacts. His detailed knowledge of West German meth-

Hans Joachim Tiedge

ods in detecting Communist spies would enable East Germany to alter espionage tactics and protect any agents deemed at risk, the

Hans Neusel, a state secretary in the Interior Ministry, said that the government had undertaken emergency measures to protect people whose work and lives could be jeopardized by Mr. Tiedge's defection. He said that the Bonn government also would carry out an urgent review of its counter -intelligence operations against East

The defection of Mr. Tiedge swelled speculation that he might have tipped off three other espionage suspects, including the per-sonal secretary of Economics Minalso are believed to have sought sanctuary in East Germany.

Mr. Tiedge was ostensibly in charge of the hunt for Ursula Richter, an official for an East European exile organization in Bonn who was suspected by security forces of acting as a control agent for several

East German spies. She vanished last weekend along with a friend, Lorenz Betzing, ar army messenger who had worked earlier inside a top-secret government bunker near Bonn that was intended to serve as an underground command post in time of

Sonia Lüneburg, Mr. Bangemann's secretary, disappeared three weeks ago after saying that she was going to Brussels for the weekend. When her story proved false, the police searched her apartment and found devices that could be used for espionage.

Mr. Neusel said that he anticipated a continuing exodus of Communist spies in the coming weeks once Mr. Tiedge informs the East German authorities about agents who could be threatened with exposure in West Germany.

There were reports that his superiors knew he had serious drinking and debt problems but allowed him to remain in his sensitive position.

Mr. Neusel confirmed the reports about Mr. Tiedge's personal problems but contended that the man would have presented a more severe risk if dismissed suddenly.

Mr. Tiedge called in sick on Monday. A nationwide search began on Wednesday when his three daughters filed a "missing person"

"This case will have serious re sults for West Germany's security, Mr. Neusel said. "If Tiedge passes ister Martin Bangemann, who have on all his knowledge to the oppodisappeared this month. The three nent secret services this will mean massive damage for West Germany's intelligence work."

U.K. Orders Testing of **Jet Engines** ed by Chir Stati

MANCHESTER, England Following the fire that killed 54 people on a British Airtours Boeing 737, British Airways said Friday that it was ordering precautionary checks on all engines of the type that exploded and set the plane on

And in Washington, U.S. safety officials confirmed that they had commended on July 22 that U.S. airlines inspect the same type of engine used on the Airtours plane.

The National Transportation Safety Board said it made the recommendation to the Federal Aviation Administration after an invesigation implicated the Pratt & Whitney engines in seven accidents

But a safety board spokesman said that there was no evidence tying Thursday's accident to the earlier ones.

Results of a survey being carried out for the FAA by Pratt & Whitney are expected next week.

British Airways, which owns British Airtours, said it had not been told of any suggestion to check its U.S.-made Pratt & Whitney JT8D engines.

But Britain's Civil Aviation Authority said that all British operators of planes with the engines had been informed of the U.S. recommendation.

The aviation authority said that the U.S. directive called for checks on certain blades in the compressors of JT8D-15 engines with more than 17,000 hours of service. The plane that caught fire Thurs-

Vacation White House: New Players Set New Rules favorable atmosphere for the most striking P. Clark, were seldom seen and even less

By Gerald M. Boyd

New York Times Service LOS ANGELES - President Ronald Reagan's summer trip to California this year has spotlighted changes in how the vacation White House operates in the second term and how the roles of key players have shifted.

One evident change, several officials here said, has been a staff much less prone to unanthorized disclosures and much more controlled by its chief. That has been achieved through a management style of Donald T. Regan, the White House chief of staff, that is at once more muscular and more detached than that of his predecessor, James

Mr. Baker had always insisted that he or a designated top-level surrogate be at Mr. Reagan's ranch near Santa Barbara or in Los Angeles when Mr. Reagan came down from

his ranch for a visit to town. By contrast, Mr. Regan spent a week in Santa Barbara, then he went to Florida on vacation. He left behind a small cadre of aides who report directly to him, and every. legan exercises his authority by telephone. Is a far cry from the vacations when his Edward J. Rollins, he governmental affairs.

Still, Mr. Regan's absence has created a one understands that although absent Mr. Regan exercises his authority by telephone.

development of this August vacation.

That has been the continued rise to prominence of Robert C. McFarlane, the president's national security adviser. In recent days, Mr. McFarlane has been the chief

Council Approves New Caledonia Plan

WORLD BRIEFS

PARIS (Reuters) — The French government's plan on New Caledonia was finally approved Friday when opposition objections were rejected by the Constitutional Council here. Local elections are now expected to be

held in the South Pacific territory by the end of next month. The nine-member council ruled that an amended bill on New Caledonia was constitutional, ending weeks of parliamentary wrangling. The bill, approved Tuesday by a special session of the National Assembly, provides for elections for four new regional councils and a referendum on

The bill gives three more seats than originally planned to the capital of Noumea, which is dominated by French settlers, but leaders of the rightist opposition said the territory's indigenous people would still benefit unfairly. The opposition forced revision of an earlier bill by referring it to the Constitutional Council. ndependence by late 1987.

Tamils Accused of Planning Offensive

COLOMBO, Sri Lanka (Combined Dispatches) — Sri Lanka accused Tamil militant groups Friday of planning a major offensive and charged the guerrillas were responsible for more than 600 cease-fire violations over eight weeks. The statement occurred a day after a Tamil guerrilla spokesman warned of "all-out war" in the Indian Ocean island nation. Meanwhile in Geneva, a Sri Lankan official said Friday that it was up to India to pressure Tamil separatists to modify their demands to facilitate a political solution to the country's ethnic crisis. Sri Lanka's minister of national security, Lalith Athulathundali, said his government "remains committed to seeking a political solution" with separatist Tamils, despite the collapse of talks Thursday following renewed violence and irreconciliable negotiating positions.

Cuba to Increase Its Forces in Angola

Isidoro Malmierca Peoli

HARARE Zimbabwe (AP) -South Africa's military incursions into Marxist Angola have forced Cuba to increase its troop preser in the former Portuguese colony, the Cuban foreign relations minis ter said Friday.

The minister, Isidoro Malmierca Peoli, in Harare on a three-day visit, said that Cuba wanted to reduce its military presence in Angola but was resolved to keep soldiers there until South African-spousored "instability" in the region ceased. Cuba has sent up to 20,000 troops into Angola to back the government of the Soviet-supported Angolan Popular Liberation Movement which took power Nov. 11.

Peres Warns of Threat to Government

JERUSALEM (AP) - Prime Minister Shimon Peres said Friday that

attacks on his administration by rightist cabinet ministers could end the partnership and bring down the coalition government.

Foreign Minister Yitzhak Shamir, at a meeting with Mr. Peres designated to repair a growing rift in the cabinet, said his party did not want to break up the 11-month-old partnership, Israel Radio said. The radio report was confirmed by a Peres aide.

Mr. Peres called the meeting following criticism by Ariel Sharon, the industry and trade minister, of a government decision to evict legislators from an apartment they occupied in Hebron, a West Bank city. The legislators were trying to expand the Jewish presence in the predominantly Arab city.

MX Successfully Launched From Silo

VANDENBERG AIR FORCE BASE, California (AP) - An unarmed MX intercontinental missile was successfully launched Friday for the first time from an underground silo, the Pentagon announced.

The four-stage missile, whose development has been a matter of controversy, put a dummy warhead in the target area in the Kwajalein

Missile Test Range in the Pacific, according to an air force spokesman. The test was considered a milestone because of the successful launch from an underground sile.

U.S. Spy Plane Crashes in El Salvador

SAN SALVADOR (Reuters) — An unmanned U.S. spy plane crashed Washington.

U.S. Reassesses Mideast Peace Talks After Murphy's Unsuccessful Mission

By John M. Goshko

WASHINGTON - The recent trip of Richard W. Murphy, assistant secretary of state for Near Eastern and South Asian affairs, to the Middle East made so little progress that the Reagan administration has begun to reassess its hope of reviving the Middle East peace process, diplomatic sources said.

The sources said that Mr. Mur-phy, in a six-day trip that ended last Sunday, was unable to win assurances that if the United States agreed to meet with a joint Jordanian-Palestinian delegation, direct talks between Jordan and Israel

ing (Mg

The administration is not ready to abandon the goal of launching new, expanded peace talks between Israel and Jordan by the end of the year, the sources stressed. The United States has devoted considerable effort to this end since King Hussein of Jordan met with President Ronald Reagan at the White House in May.

But, the sources said, the administration will not be able to put off much longer a decision about whether to risk serious strains in U.S. relations with Israel by acceding to Hussein's wishes and meeting with the joint Jordanian-Palestinian delegation.

The bills and the regulations mainly would hurt the so-called "gray market" in foreign autos. This market is made up of cars that are imported for resale by compa-nies that bypass the manufacturers' distribution networks.

But the measures could also affect Americans who buy cars while working abroad and want to bring them back to the United States.

Under current law, uncertified vehicles can be imported if their owners have them upgraded to meet U.S. standards.

Because prices overseas can be thousands of dollars less than those at franchised dealerships in the United States, some U.S. companies and individuals have bought Transportation is expected to issue cars abroad and shipped them to regulations next month that would the United States for resale.

New York 2000: A Growth Odyssey

The shine will stay on the Big Apple for the rest of this century, according to a newly published economic analysis. It says the economy of New York City and its suburbs, buoyed by a fiveyear recovery, has entered a peri-od of sustained growth that is threatened only by a housing shortage.

The study, reported in The New York Times, concludes that the nation's largest urban area has fully recovered from the economic crunch of the 1970s, when New York City came close to bankruptcy and hundreds of businesses closed.

We are no longer looking at an aging economy, but one that is vital and growing," said Regina B. Armstrong, an economist who conducted the analysis for the Regional Plan Association, an economic research group.

Her study predicts the area's

opulation, employment and industrial output will grow at a rate slightly below the U.S. average but still will increase rapidly for the next 15 years.

The study projects that the city, which lost more than 450,000 jobs in the 1970s, will regain a similar number by the century's end. The metropolitan area lost 564,000 residents from 1972 to 1982, the study said, but it will gain more than two million in the next 15 years. Ms. Arm-

Short Takes

The Smithsonian Institution is preparing for a surge of calls on its Dial-a-Phenomenon number as Halley's comet nears. Recent calls to the number - (202) 357-2000 - have been spurred by the Pleiades meteor shower. To observe it, a recorded message suggests, a person should simply lie on the ground on a clear night and look up at the sky. For Halley's, it counsels patience. The comet will not be visible through small telescopes for another month or two, even later to the naked eye.

The mumber of Americans who died in home fires dropped 14 percent in 1984, largely because of a decline in arson. A survey by the National Fire Prevention Association reported 4,075 home deaths in 1984, down from 4,670 in 1983. The association cited a more coordinated effort by authorities to identify and arrest arsonists, and the continued increase in the use of automatic smoke detectors, which are now in three-fourths of U.S. homes.

Shorter Takes: Forty-eight percent of all state and local government workers were employed in education last year... The cost of driving a car fell in 1984

Three Mile Island: Legal Chain Reaction

More than six years after the nuclear accident at Three Mile Island in Pennsylvania, area residents are going to court in droves, blaming the mishap for problems from cancer to AIDS. More than 1,300 such suits have been filed; more than 100 were registered last week alone. "I counted to 1,000," said Dauphin County Judge William Lipsitt, "and then I gave up."

The deluge followed recent re-ports that injury claims filed af-ter the March 1979 accident led to at least \$3.9 million in settlements, though the plant did not admit liability.

Some people say they are suing simply as a way to get infor-mation. "I would like to know." said Naomi Livingston, who thinks the accident may have caused her breast cancer, "what was released down there."

But Fred Speaker, an attorney for American Nuclear Insurers, was skeptical. Some of the plaintiffs, he said, "view the accident as opening up some very deep pockets."

But the spy dust, like the White Honse's announcement of a new anti-satellite President Rouald Reagan's November meeting with the Soviet leader, Mikhail Gorbachev.

The last few weeks have seen a torrent of

tough talk from the White House, antiphony to the propaganda blasts from Moscow. The Kremlin's promise of a five-month moratorium on nuclear tests got the rapid brush-off it deserved. But then the White House announced it was not interested either in a comprehensive ban on anti-satellite missiles. At this rate of attrition, there will be little left to talk about at the Geneva summit meeting.

White House tacticians may see several advantages in striking a harsh pre-summit attitude. It softens up the Russians, lowers public expectations and guards against criticism of concessions. But there are dangers of excess.

The anti-satellite tests in particular are perilous brinkmanship. Surveillance and earlywarning satellites provide a stabilizing force that both sides benefit in keeping inviolate, particularly the United States. To avoid drifting into an arms race no one needed, the American anti-satellite missile system was terminated in 1975. But the Soviet Union rashly

There is a new, unwelcome entry in the continued development, and the Defense Department started in 1977 to develop the new

eapon that is now ready to be tested. Unlike the combersome Soviet anti-satellite rocket, the Air Force's new missile is a highly advanced "homing vehicle" fired from an F-15 fighter. Once it is operational, the Soviet Union may feel unable to accept a treaty until it has caught up. Since homing vehicles can shoot down missiles as well as satellites, the advancing technology threatens to erode the anti-ballistic missile treaty.

The three tests that Congress has allowed the Air Force to conduct may not be enough to make the anti-satellite missile operational. But they are strides along a path from which there will soon be no return. Why risk stimulating a race in which there are only losers?

Mr. Reagan has spent \$1 trillion on rebuilding defense. He has hung tough in arms talks, letting the Soviet Union stalk out in dudgeon and walk back empty-handed. He left every-one guessing if he would continue to abide by the unratified SALT-2 treaty, accepting its limitations only at the last minute. Presumably he intends, at Geneva also, to present a tough image while preparing to take the last exit to a pragmatic compromise. That is not a bad negotiating strategy, if it works. The problem is the legacy he will leave if it does not: unbridled competition in every form of strategic weapon-ry. Spy dust stories may be useful adjuncts of the performer's art; anti-satellite tests are playing with unquenchable fire.

-THE NEW YORK TIMES.

Eclipse of Mr. Moon Is Over

The Reverend Sun Myung Moon was re-leased this week from a halfway house in Brooklyn after serving 13 months - most of it in the federal prison in Danbury, Connecticut - for tax fraud. For weeks before this event. full-page ads appeared in newspapers, includ-ing this one, questioning the justice of Mr. Moon's conviction. And at a news conference in Washington following his release, Mr. Moon's supporters, some of whom are clergymen, charged that his case was a serious in-

fringement of First Amendment rights.

These arguments have been heard before. They were made before a series of federal courts to no avail. They were put forward by lawyers and public relations firms when the Supreme Court was considering a petition to bear Mr. Moon's appeal; but that petition was denied. It is reasonable to assume that these arguments failed to persuade a single court because they have no merit.

Mr. Moon was not prosecuted for criminal violation of the tax laws over a simple mismderstanding or an innocent omission on his return. He was convicted not only of failing to report personal income but also of concoct with his associates, fraudulent evidence to show that the funds in question were actually the property of his church. Freedom of religion is not threatened by this conviction, nor are other church leaders in jeopardy so long as they do not participate in conspiracies to conceal personal assets, forge documents or defraud the federal government

The same law applies to every religious group. Church funds used for church purposes in tax-exempt; funds that belong to individuals or that are generated by commercial or unrelated business activities of the church are taxable. Juries can make factual findings about the source and ownership of assets.

It is fine that Mr. Moon has completed his sentence and was a model prisoner. But he is not a martyr and is not entitled to be treated as

Other Opinion

Tanzania: Victim of Fallacies

Compared with many of his peers, President Julius Nyerere has appeared the very model of an African national leader. His sincere commitment to socialism and his much-trumpeted personal integrity have made him the hero of many Western liberals. Yet, as Mr. Nyerere prepares to stand down from office after 24 years, he seems a pathetic figure — a man whose vain attachment to doctrinal purity has inflicted economic misery and destitution on a once relatively prosperous country.

the fallacies of so-called "development economics," the main teachings of which are that the price mechanism and the free market have no relevance for the Third World and must be supplanted by an disastrous dirigisme. - The Daily Telegraph (London).

Another Hurdle for ANZUS

Agents of the French intelligence service seem to have been caught red-handed in a murderous sortie into New Zealand. New Zealanders are furious, and all that France has to show for its caper are a dead photographer, a sunken ship and another big problem for the ANZUS defense alliance in the South Pacific.

France is geared up for nuclear-weapons tests on Muraroa atoll in French Polynesia. Such tests are opposed by New Zealand, Australia and various island nations in the South Pacific that are working to establish a nuclearfree zone in the region. The Rainbow Warrior, flagship of the Greenpeace environmental movement, was in the area to lead demonstrations against the tests when it was blown up and sunk by saboteurs in Auckland on July 10. One crewman was killed.

It developed that the General Directorate of External Security, France's equivalent of the CIA, was almost certainly involved. Mainstream French newspapers report that a

if he had been a prisoner of conscience.

- THE WASHINGTON POST. French-speaking couple arrested and charged with murder and sabotage were French agents. France has not acknowledged any involvement, but an investigation ordered by President François Mitterrand is under way. The

cials must have known of the operation. As things stand, Greenpeace plans to send another ship to the Pacific to replace the Rambow Warrior, and the French navy is said to be under orders to use whatever force is necessary to prevent interference with the tests.

prevailing view in Paris is that high-level offi-

From the U.S. viewpoint the worst this about the incident is that it feeds the already virulent anti-nuclear sentiment in the South Pacific — sentiment that is reflected in the squabble between the United States and New Zealand over the visit of nuclear-capable warships to New Zealand ports.

FROM OUR AUG. 24 PAGES, 75 AND 50 YEARS AGO

1910: Dirigible Delights Rockefeller CLEVELAND - Mr. John D. Rockefeller threw dignity to the winds late this afternoon and, tossing his cap in the air, ran about his lawn just like a schoolboy. He was jubilant because Mr. Frank Goodale, the young aeronaut, alighted at Forest Hill to pay his respects to him. Mr. Goodale is giving exhibition flights at Luna Park and before he set sail this afternoon he announced that he would visit Mr. Rockefeller. The head of the Standard Oil Company was eating his supper when the lodge keeper announced that an airship was alighting on the grounds. Mr. Rockefeller and his family rushed out as Goodale, in his dirigible ballon, was landing. "Welcome, welcome, my boy," cried Mr. Rockefeller. Mr. Goodale said he "just dropped down" to pay his respects. He was invited to dinner but declined.

1935: House Passes Neutrality Bill WASHINGTON - The House passed the washington — the House passed the compromise neutrality bill by acclamation on [Aug. 23.] Spurred by fears that the Administration might be contemplating support of a European attempt to apply pressure on Italy, Congress succeeded today with plans to tie the President's hands with neutrality legislation for the next six months. The suggestion that the President should receive permissive rather than mandatory powers in dealing with belli-gerents was rejected by the House. House leaders assured that these changes were acceptable to the Senate. Protests from Administration officials, notably those of the State Department, that provisions of the act would force the country to "run for cover" whenever war starts and would destroy the country's influence for peace, were disregarded.

Nyerere Leaves Flawed Legacy in Tanzania

LONDON — Last week, Julius Nyerere, the Shakespeare-translating Christian and socialist president of Tanzania formally announced that he was stepping down fter 30 years in office.

No one will accuse him of having amassed a fortune. Unless he has been especially thrifty on his \$8,000a-year salary, he has little saved for retirement. He has no splendid mansion and will probably spend much of his time from now on in his house situated in his home village in the north of the country. Nevertheless, in political and eco-

nomic terms this man walks off the stage having failed to achieve what he set out to do. He has not made Tanzania a good place in which to live. My first encounter with Julius Nyerere was watching him on a Brit-ish Broadcasting Corp. television program years ago. I was a student, and he was a teacher. During the

school holidays he organized Tan-ganyika's (as it was then) struggle for independence from the British. He was not, and never became, a flywisk-carrying orator. Lucid, intelligent and thoughtful, his interviews and speeches were a joy to watch, delivered without bombast, but with

humor. They were well reasoned. No wonder that many students in West came to revere Mr. Nyerere. He inspired us with a moral justifica-tion for helping fight the anti-colon-ial fight at home. Students always like their battles to be right versus wrong and Mr. Nyerere made it easy for us. We believed there would be a new

Africa once the colonial powers withdrew, in which black men would find their proper dignity. The best of old Africa — family life, communal endeavor, gentleness and good humor
— would be combined with the task of starting nation-state building from square one. How wonderful to have a clean sheet and avoid the mistakes of Europe and North America!

By Jonathan Power

Tanzania's southern highlands, organizing farmers' cooperatives and teaching in the evening. One of my students became the minister of agriculture. Later still, as a journalist. I came back frequently to film, report on and interview the president

My admiration of him lived on. Mr. Nyerere's modesty, perceptiveness and self criticism were beguiling. How is it, then, that I now consider Mr. Nyerere's Tanzania flawed? It is partly because, in the nature of man, I expected a performance I do

External influences apart, Mr. Nyerere made policies that eventually destroyed the values he stood for.

not demand in my own country. Also, it is because Mr. Nyerere is only one Tanzanian and, however popular and respected he has remained, he is not a demigod and has relied heavily on other people to implement his policies. Those people did not live up to his ideals or honor his trust.

Also responsible for my view of Mr. Nyerere's legacy is the inevitable fallout from the clash of cultures. The British left behind a middle and urban class who were at odds with peasant-dominated society in Tanzania. But Tanzanians pushed their own self interest with a singleminded purpose: to live like the British bwana mkubwa (big man) who had set a certain style and standard of living.

Later I worked in the villages of adequate the soils are poor. Only the volcanic soils near Mount Kilimania-

ro are truly fertile.

But there is potential. The north east of Brazil, the poorest area of that country, is on the same latitude and has much the same ecology as Tanzania. But it is much more developed

than its African counterpart.

Tanzania, too, has had more than its fair share of troubles from the vicissitudes of the world economy. The prices of its major exports sisal tobacco, sugar and cotton -have been unstable and have been falling for the last few years.

But despite external economic in

fluences, the blame lies with Mr. Nyerere in the final analysis. He devised policies that eventually destroyed the values he stood for. His economic policies, rather than releasing the potential of peasant agriculture, as has happened in Malawi and Zimbabwe, have undermined it. The attempt to communalize agricul-ture ended up overwhelming Tanzama's limited management resources. Peasants used to living in simple family compounds were corralled into

villages, often far from good land and a decent water supply.

Despite Mr. Nyerere's overwhelming public commitment to the countries. tryside, state controlled prices for agricultural produce were kept low to placate the relatively small, but politically volatile, urban population. The peasants therefore had little incentive to produce and diversify.

On the political front Mr. Nyerere's attempt to break away from the formalized structures of British government to create a society more tru-Another side of the problem lies in Interesting African tribal consensus Interesting African tribal consensus Interesting African tribal consensus politics, ended up creating a near poorest countries and even with the best will and the best management it crude as other African dictatorships, will always remain so. Much of it is too many people in Tanzania have

Over the years freedom fighters from Mozambique, Zimbabwe, Na-mibia and South Africa have come to owe Mr. Nyerere a lot for the hospitality and support he extended. Nev-ertheless, there are those within those movements, in particular SWAPO, or the South-West Africa People's Orga-nization, who remember only the inside of Mr. Nyerere's jails.

Dissenters to these movements' es-tablished leadership were given short. shrift. By contrast, on the big issues

Mr. Nyerere's political counsel has usually been in the direction of com-promise and tolerance. He made the and of the war in Rhodesia possible. Mr. Nyerere steps down voluntarily—a considerable achievement in itself. Most post colonial African leaders have left office only on death or after a coup d'état. But, as he goes, I wonder how he feels, this most selfcritical of men. Why did it all have to

go so very badly wrong? International Herald Tribune.

U.S. Drug Rules May Be Hindering AIDS Research

By Harry Schwartz

SCARSDALE, New York — Public awareness of the AIDS epidemic is now greater than ever before. The numbers explain why.

More than 12,000 cases have been diagnosed to date and more than 6,000 Americans have died of the disease. The great majority of AIDS victims are young mea in the prime of life, not elderly citizens.

In this situation the clamor for a medicine to cure AIDS, or Acquired Immune Deficiency Syndrome, is naturally mounting. And so is the number of Americans who — like Rock Hudson — are going abroad to try medicines that are unavailable in the United States because of Food and Drug Administration rules. The FDA insists that its rules are intended to protect sick people; the AIDS victims in America who are running to Mexico, France and other countries for treatment obviously believe the FDA rules are too strict.

What this means, clearly, is that despite the great public uproar over AIDS, the United States has not yet focused attention on the key questions: How do we discover new medican we do to encourage and speed up such discoveries against AIDS and other killing and crippling ailments? Recently, an influential member of

the House of Representatives sneered publicly when told that the average cost of research and development for a new drug now approaches \$100 million. The figure, he said, must surely be grossly inflated to justify the profits of the pharmaceurical industry. Oddly, this same Congressman has a relatively high number of AIDS victims among his constituents. Would he cavil, one wonders, at appropriating hundreds of millions of dollars to find a cure for AIDS?

The great majority of new and effective medicines are discovered by the private pharmaceutical industry, which is under constant attack. An endless stream of critics complain that drug prices are too high, that

WASHINGTON — By political standards Reaganomics would

Running on much the same plat-form in 1984 as he did in 1980,

Ronald Reagan was re-elected with a substantial plurality. The inter-

vening four years apparently did not dissuade voters of Mr. Reagan's

competence to manage the economy. So-called supply-side economics comprised much of Reagano-

mics then as it does today.

On nonpolitical grounds the supply-side record is wide open to all

While a tax bill was passed in 1981, the actual tax cuts made pos-

sible by the legislation did not occur

until months, sometimes years later.

delayed, in reality there was only a

1981, a cumulative 10-percent cut in 1982 and a cumulative 20-percent cut during the whole of 1983. The bulk of U.S. tax cuts began

on Jan. 1, 1983, and the economic

recovery began at the same time. Isn't it amazing bow tax reductions

do not work until they take effect? More to the point, the downturn

of 1981 and 1982 as foreseen by

many a supply-side economist was actually the consequence of the de-

In the year before a tax cut, most people do everything that they can to postpone realizing income from the higher-taxed year in order to defer its recognition until the lower-

seem to be successful.

that many drugs permitted on the market are really unsafe, and so on. The fact that therapeutic drugs contribute enormously to improved health and longevity usually goes unmentioned. So does the fact that these medicines are often the most cost-effective therapies known.

This climate of discussion hardly encourages pharmaceutical firms to invest tens of millions of dollars looking for a remedy for a disease like AIDS, where much of the basic science required is still unknown.

Neither Congress nor the general public has any idea of what an army of chemists, pharmacologists, toxi-cologists and other specialists is required in the typical modern hunt for a new drug. Nor is there any under-standing of how many years and how many tens of millions of dollars can be - and often are - spent fruitless-

foreign investments, grew in those

effects of tax cuts.

not be found. The harsh realities are suggested by the fact that corporations that spend \$300 million or \$400 million a year on pharmaceutical re-search do well if they average even one marketable, newly discovered drug every two years. Pharmaceutical research is always

a gamble, even when there is a far better background of scientific knowledge than we now have about AIDS. The huge financial risks of this research make wildcat oil exploration seem tame by comparison. This background suggests that the

tragic AIDS epidemic could have a positive byproduct if it produces a new look at the conventional wisdom in the drug field. AIDS victims, understandably

want a cure, not a compound that is guaranteed never to have a harmful side effect on anybody under any

money supply that includes curren-

cy in circulation, travelers checks and checking deposits at financial

institutions, was exceptionally high during the 1983-84 period, averag-

ing a 7.8-percent rate.
In 1979, the last time inflation

accelerated to double digits, the

same measure of the money supply grew by some 7.2 percent. Rapid money growth is seen by traditionalists as leading to a higher

inflation rate and interest rates, in

tion, interest rates and a stronger

dollar. The Fed's success, however,

was not based on austerity.

The Fed changed its policy to targeting prices. This fundamental policy change allows rapid money growth to coexist with lower infla-

tion, lower rates of interest and an expanding economy.

All this means there should be no

more stagilation.

Federal budget deficits are a lot larger than I ever thought they

would be, especially given the eco-nomic growth experienced in the past two and a half years.

By Lester Bernstein

IDO BEACH, New York - If Congress lets it go through, the Chinese will soon be able to act on President Ropald Reagan's agreement allowing them to buy American nuclear reactors for electric power.
Some may ask whether we should be
making nuclear reactors available to
China. But the more interesting question is why on earth the Chinese would want to buy them from a country that has made such a singular borch of its nuclear-power program. Even more intriguing is the prospect that the Chinese may be able to

teach us how to use the reactors. Mr. Reagan's agreement does a considerable favor for American manufacturers. China is free to make. deals with French and West German manufacturers, who are just as eager as Americans are to supply the 10 plants China plans to build in a market estimated by the Chinese to involve \$10 billion to \$20 billion.

For their part, U.S. manufacturers have not attracted a single domestic order for a miclear reactor since 1979. That was the year of the accident at Three Mile Island and, coincidental ly, its cinematic premonition, "The China Syndrome." The movie raised the specter of the ultimate catastro phe in a nuclear power plant - ameltdown so devastating in its inten-sity that it might burn through the earth all the way to China

For reasons deeper than Three Mile Island and the shock waves it created among environmentalists, unclear-power development in the United States is at a dead end. There are 82 plants in commercial opera-tion but at least 110 more have been abandoned with a loss of \$15 billion. It now takes 12 years to build a plant. Those that have opened since 1983 or still await completion have

run six to eight times over budget; they cost three to four times more than their predecessors. After such overruns, some new plants will be unable to compete with oil, let alone coal, and half a dozen nuclear-invested unlities are near bankruptcy.
Yet the experts and global experi-

ence insist that American-pioneered technology can really work safely and efficiently. The world has 344 functioning plants, many of them with reactors made in the United States. The French use nuclear power to produce 60 percent of their electricity, four times the U.S. percentage.

Ironically, the Chinese may be able to do a better job with U.S. equip-ment than the United States. The U.S. program has been plagued by chaotic regulations, failure to stan-dardize plant design, incompetence in such low-tech crafts as pouring concrete and welding metal, misman-aged contractors and subcontractors, inadequate overtight by state and federal officials, and an ingrained pass-the-buck psychology. This means blaming the regulator who concocts rules heedless of cost, the supplier who piles add-ons to his cost-plus contract, the utility executive who tries to pass it all into the rate base inflicted on consumers.

succeed precisely because they do not do things in what Americans are usually pleased to call the American way. Regulation is second nature to them, and denial has bred a certain parsimony. China is not celebrated for its protest marches, and the cause of environmental safety may lack some urgency in a country so overpopulat-ed that it tries to ration the number of children in a family.

True, corruption is no stranger to the Chinese, but ideology gives them a passion for standardization and enorcement. They need take no guff from ratepayers or shareholders, and their managers will see to it that he who fails to pour concrete as he should may wind up in it.

Finally, the Chinese have a fine example of what not to do: the U.S.

example. Americans ought to be able to learn from their own mistakes, and must do so if they are to answer the call for a whole new round of nuclear-energy development before the

Can it be done in a democratic can it be done in a democratic society? The success of France suggests it can, but not without some wrenching adjustments. For example, the French government itself designs, builds and regulates all the nuclear plants in two standardized models. By contrast, almost no two 11 S plants are alike. U.S. plants are alike It would be the final twist of irony

if it took a Chinese success to shame America into using its own technology in a rigorous way.

The writer is a former editor of Newsweek. He contributed this comment to The New York Times.

LETTER

Nuclear Energy Growth Regarding the editorial "Keep the Oil Noose Loose" (Aug. 13): have gone wrong?
Congress has literally gone on a spending spree in non-defense items. It exceeded the generous projections of January 1983 by a staggering \$77.8 billion.

It is astute to point out that in the last decade America has reduced its reliance on imported oil by about four million barrels a day and that the economy has indeed prospered even though total energy consumption has remained relatively constant. The observation that conservation is the cause of this new situation is

Consultant, International

The observation that conservation is the cause of this new situation is, however, only part of the story. Another very important factor is the new electrification of the nation.

The United States now uses over 30 percent more electric power than it did in 1973. Nuclear energy is now second only to coal as the nation's source of electric energy ahead of oil, natural gas and hydropower.

Nuclear energy has proved its safety and reliability. It is essential if we are to continue to move beyond con dependence on imported oil.

"A few months ago, this looked like absolute desert" said Allen Jones, head of the United Nations's World Food Program operation in Sudan, "I couldn't believe anything had ever grown here."

In western Sudan, as in many parts of Africa, the main part of the head of agricultural services for the relief effort is coming to an end and a more difficult period of recovery and rehabilitation is about to be-

Throughout vast areas of the continent, the drought has broken, though there is no gnarantee that adequate rains will continue to fall.

Despite foul-ups, bottlenecks and diversion of food, aid has reached millions in need. A surpris- UN ing number of peasants, particularly in the western Sudan, where coupled with "misappropriation" many had predicted a catastrophe, of resources, had too often meant that "the truly needy received little or no aid by subsisting on such nourishment as roots and wild berman the such that "the truly needy received little or nothing."

But development specialists say

Hundreds of thousands of others did not manage to survive what will certainly be known as the great famine of the mid-1980s. Tens of millions of Africans continue to suffer from hunger, malnutrition and chronic disease

A few weeks ago the United Nations issued an emergency appeal for aid for Sudan. But after a tour of Darfur, the hardest-hit western region, the executive coordinator for emergency operations, Maurice F. Strong, concluded that what was needed was to use the food and trucks already in Sudan.

be of much value. "We have to do everything we can to mobilize those resources that we can use now, in the next few weeks," said Mr.

"After that," he added, "we need to start working for the longer Within days, U.S. hericopters are to begin operating in southern Dar-fur and along the Chad border, ferrying food to camps and villages

that have been cut off by rain and Peasants in those and other areas will need all the strength they can duster to tend their crops and reap this year's main harvest, hoped for

"In places that aid hasn't reached," said George Calderbank, internationally financed Western Sahara Development Corp., "farmers are so weak they're actually collapsing in the fields, just falling down in the middle of weeding."

To distribute the food where it is most needed will require that rural areas of severe deprivation be identified and monitored.

A recent study by Unicel, the N Children's Fund, concluded that "blanket distribution" of aid,

But development specialists say that after the harvest, most areas should be quickly weaned from re-lief aid. "The farmers are obviously very poor, and many of them are deeply in debt," said James Ogborn, the senior agronomist for

They need a good harvest this year and a good price for their crop," Mr. Ogborn said. "A distribution of 'Reagan' after the harvest will only hold prices down and ensure that they remain destitute."

Western Sahara Development.

In Sudan alone as many as a million peasants are still in camps

the relief and rehabilitation efforts

Experts say such conflict can be minimized, although not eliminated, through planning and coordination among the many organizations working in Sudan, Ethiopia and other African countries. Such coordination has been limited so far, but at least a few aid officials are

After the harvest, Mr. Strong said, undistributed foreign grain should be immediately warehoused and reserved for future emergen-

work on such aid projects as plant-ing trees to hold back the desert or improving sanitation in diseaseridden inner cities and paid in cash that they could use to buy food

Donated fertilizers could be sold to those farmers, and the proceeds used to continue the environmental rehabilitation programs.

Western development specialists contend that profound changes will be needed in governmental policies that provide food for soldiers and bureaucrats at the expense of the peasants who produce it. Such policies have long been the rule in most of the famine-afflicted countries of

Finally, for rehabilitation to succeed, progress must be made to-ward settling the civil wars that have caused widespread destruction, hastened economic deterioration and interfered with relief efor urban squatter settlements, or forts in Sudan, Ethiopia, Chad and Supplies ordered from abroad will return to rural areas too late to virtually every other African nation now are unlikely to arrive in time to plant this year, so conflict between where hunger has been severe.

It said the division's illegal activfirst confirmation of military involvement in a profiteering scandal

Chinese Navy airplanes were used illegally to transport imported consumer goods for resale at a high markup earlier this year despite repeated injunctions from central government authorities against such activities, according to the People's Liberation Army Daily. ed consumer goods to the main-land, given the navy's heavy in-In an Aug. 17 report, the military volvement in strategic Hainan, It would be difficult to move thoudaily said that from January to

March of this year, a certain unidentified air force unit of the Chinese Navy used military aircraft on six occasions to transport from Hainan island to Sichuan province imported consumer products that were not supposed to be brought out of Hainan. Hainan has been designated an

ied to other areas with special development zones that have a degree of economic autonomy. The products from Hainan included more than 6,000 video cas-

settes, 1,038 video cassette recorders, 386 television sets, and one Japanese-made minibus. The total value of the products was more than 6 million yuan (\$2.07 million), the military newspaper said. The People's Liberation Army

Daily thus confirmed earlier suspicions of military involvement in China's recently disclosed Hainan affair, viewed by some observers as the biggest profiteering scandal to occur since the country began its open-door policy toward trade and

investment more than six years ago. Earlier unconfirmed reports indicated that the Chinese Navy had played a role in illegally transporting by sea thousands of imported motor vehicles from Hainan to the Chinese mainland.

It was not clear whether the military newspaper had addressed the question of sea transport in other editions, since the publication is not easily obtained by foreigners. Foreigners are not allowed to subscribe to it. The reported involvement of na-

val aircraft in the Hainan affair would have constituted only one

Chinese Navy Reportedly Had Role In Large-Scale Profiteering Scandal By Dan Southerland

were still under investigation. Foreigners here said it is logical to assume that the navy used not only airplanes but also sea-going vessels to carry some of the import-

sands of vehicles in a relatively short period of time by means other than military sea transport. When the Hainan scandal was first disclosed three weeks ago, the Chinese press cited investigative re-ports showing that 89,000 motor hicles were moved from Hainan to the mainland for resale, along "open port" with import privileges with other imported consumer

be revealed. Xinhua said earlier ities occurred after central governthat 143 cases of criminal practice ment authorities had formally stipulated that government organizations not engage in business activities.

Even after a discipline inspection team was sent to Hainan in early March to investigate the case, leaders of the navy division were reported to have ignored the investieation and continued to transport imported products off the island for resale elsewhere.

A military commission of the Communist Party Central Committee accused leading cadres of the navy division of forgetting Communist Party ideals and discipline. A party warning was delivcred to the commander and political commissar of the division and goods, which were then resold at serious demerits were recorded in double or triple their original price. their records, the People's Liberation Army Daily said. The divi-sion's chief of staff also got a warning and demerit.

> Corruption in the Chinese military is a sensitive issue, given the traditional image of the armed forces as a highly disciplined force.

But the official press has from time to time touched on the subject in recent years. In December 1983. for example, the English-language China Daily reported that two navy officers at the Canton naval base who sold airplane fuel to a traffickinvitation from Prime Minister er in exchange for gifts were sent to

Deng Xiaoping, the Chinese leader.

For Deng's 81st Birthday, the Press In Beijing Publishes a Gift of Song

BELTING — The official press published on Friday the lyrics of a song strongly praising the Chinese leader, Deng Xiaoping, in preparation for his 81st birthday Saturday.

Mr. Deng has avoided the personality cult that surrounded his predecessors, Mao and Hua Guofeng, but analysts said that the new song, "Hello, Xiaoping," recalled such tunes as "Our Leader Chair-

The song's lyrics were translated as follows:

The smiles which had been lost today grace the eyebrows, The bound feet now prance over the golden bridge.
The singing which had been swallowed bursts from the breast, Hello Xiaoping, hello Xiaoping,

Mr. Deng has engineered China's economic opening to the West since he returned to power in 1978, following a period of disgrace under Mao. He has gained popularity among Chinese for his

relatively pragmatic approach to government.

Biographies of Chinese leaders are generally sketchy, and in the absence of official guidance, Mr. Deng's 80th birthday was widely marked last year on Aug. 22. But according to a Foreign Ministry spokeswoman, his birth date was Aug. 24, 1904.

Liberia Tries Dissident Banker on Sedition Charges

By Edward A. Gargan

New York Times Service NEW YORK - An international banking executive for Citibank, who is a leader of an opposition party in Liberia, has gone on trial on sedition charges in Monrovia, the Liberian capital, according to officials at the United Nations and the State Department.

The trial by military tribunal of the banker, Ellen Johnson-Sirleaf, began on Thursday. It came two months before scheduled elections that are to mark a return to civilian

rule in Liberia. General Samuel K. Doe, Liberia's leader, has asserted that a speech given last month by Mrs. station is making the organizers of Johnson-Sirleaf in Philadelphia events pay for news coverage, the stability of the country.

Role of Soviet Seasonal Workers Arouses Debate

By Celestine Bohlen

Washington Past Service
MOSCOW — To a police colonel in the north Caucasus, they are nothing more than "money grubbers, who work from dawn to dusk, don't drink, live in swinish conditions and suffer untold hardships. just for the sake of half a sack of

That makes shabashniki, as migrant seasonal workers in the Soviet Union are known, alien to "the principles of our economy and of our morals" and "socially harmful," as A. Didyenko concluded in

a letter to the newspaper Izvestia. This is one view of a group of workers whose precarious existence on the fringes of private enterprise has prompted a hot debate in the Soviet press.

Another view comes from a shabashnik himself. "Yes, we earn good wages," said one who dared not give his name to the newspaper.

And this automatically puts the law enforcement bodies on the

In recent months, as public dialogue about Soviet economic op-tions has opened up, the shabashnik has emerged as the focus of several key questions: To what extent can people accumulate private wealth in the Soviet Union, and

how should the state control it? The debate so far has been rather positive toward the shabashniki, whose initiative is compared favorably to sluggish performances in the official economy. The trend seems to be toward a more flexible definition of legal work outside the

public sector. The issue also has led to discussions about the need for tax reform, perhaps involving a single progressive income tax that would treat salaried and nonsalaried income alike. Other proposals for controlling incomes aired recently in the press include reduction on interest

Auctioneers Should Turn Back Clock on Estimates

THE two leading auction

I houses, Sotheby's and Chris-tie's, had difficult moments in the season that ended July 31. The heart of the matter was that the auction houses departed from their

SOUREN MELIKIAN

lic perception of it. After the Florence Gould sale of Impressionist works, professional circles buzzed with the rumor that A. Alfred ship, which took Christie's to court, Tanbman, Sotheby's owner, had was exasperated by reserves being acquired the \$9.9-million Van raised at the 11th hour, allegedly Gogh and, it was later said, the without his knowledge, and by di-\$5.2-million Toulouse-Lantrec. It verging opinions within Christie's is now known, a reliable source regarding says, that he did not buy the Van was not informed. Gogh but did acquire the Tou-louse-Lautrec. And why not? complaints would have been made Taubman has been collecting for a against the "floating reserves," as long time and the painting was the they were referred to, nor the diverthe estimate and reserve game is sale's most plausible candidate for gent estimates. The outrage was ultimately harmful to the system. It the status of a museum picture.

partmental heads to buy from their the truth within days—but the real ed in high failure rates. At Sothown sales, Should not Taubman, as problem was the estimates and the eby's main Impressionist sale in total value. The next day Sotheby's way in which they are used by auctional last March, 46 percent of could comfort itself with a \$3.9from doing what his subordinates are not allowed to do? By stepping in, he was influencing prices.

Christie's infinitely more serious role as arbiters in the art market to

case also stems from its having
gone beyond its role as arbiter of
the market. David Bathurst, then its New York president, lied in May 1981, saying that three out of become actors. They were not con-tent to keep a record of prices paid at their sales, but tried to influence a buyer. He did so "to protect the market and the vendor's interests," he declared in court papers. Far ous. What is significant is the pubmore seriously. Christie's kept liddling with estimates and reserves. The vendor, Dimitry Jodidio, chairman of the Cristallina dealer-

tion houses to steer the market.

The higher end of the estimate could be twice the lower, or more. It was determined weeks in adof what he might get, and not much fuss was made about it. The vendor agreed to a reserve set, as a purely protective measure, below the lower estimate

Now auction house experts finetune their estimates for weeks, testing the reactions of dealers and collectors who come to see the piece, saying "in confidence" to potential buyers that the work might fetch a lot more than the original estimate. Sometimes, the vendor, who is kept informed, accordingly raises his reserve. He, as much as the auction house, bears the blame for this constant readjustment. If this happens so often these days, it Had the sale been successful no is because the vendor is often a

Whatever the cause, however, The snag is that an unwritten portant lie—those in a position to is upward; when the economy rule forbids auctioneers and de-

ion houses to steer the market. the pictures, in terms of the total

million sale of Chinese ceramics, leaving 3 percent unsold, but on June 5 the buy-in rate in the sale of Chinese works of art from the Alan Hartman dealership reached 53

Clearly, auction houses have a problem with their appraisal proce-dure as far as both estimates and reserves are concerned. The experts who have been involved in most auctions with high buy-in rates are too experienced to have been unaware that the estimates they were giving were far too optimistic. Mi-chel Stranss, the leading Impres-sionist expert in Sotheby's London operation, and James Lally, for years Sotheby's top Chinese expert in New York, who is leaving the But this does not apply to the house at the end of the year, are among the best people in their field. Both have an acute perception of quality and financial value.
Their failures are unlikely to reflect errors of judgment. My guess is that they gave into pressure from the vendor or perhaps that they went out of their way to entice the vendor for fear of loosing him to the competition.

While the consequences were less ominous, these June sales, in the aspect of inflated estimates, were like minor replays of Christie's catastrophic auction of the paintings owned by Cristallina.

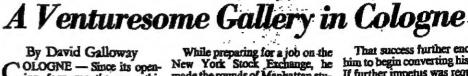

Here is where reform is most urgently needed. Estimates must once again become real estimates. Reserves must be protective barri-ers set below the lower end of the estimate. This could be enforced egally, since the reserve is specified by contract. (The practice of agreeing orally to alter reserves should be discarded.) There should be a time limit beyond which neither the consignor nor the auction house would be allowed to modify the reserve, say seven days before the

Auction houses should be discouraged from advertising estimates before sales; now done systematically, this was the exception two decades ago. Estimates should be aimed at informing would-be buyers, not at yanking up prices. A code of conduct should be worked out by the auction houses.

The news media might do some soul-searching too. No self-respecting writer of so-called straight news would dream of reporting that a wonderful painting by the famous X, offered by Z, the wellknown dealer, is expected to fetch so many millions of dollars, but this is exactly what happens every month in the auction field, as witsess in recent months the Gould sale, the Mantegna "Adoration of the Magi" and the Portland gold font splashed all over the London

Selling by auction, like dealing, is a commercial activity. Relaying auction-house news releases before sales and carrying starry-eyed inperts about their own wares is providing free advertising, with harmful effects; part of the public gains the impression that these are objective statements.

Last of three articles.

By David Galloway OLOGNE - Since its opening four months ago, this city's newest, biggest and most adventuresome private gallery has mounted three major exhibitions. Such a tempo would weary most museum curators, but Thomas Krings-Ernst, 38, learned to pace himself on the fast-track of international finance.

At 26, Krings-Ernst engineered a French-German venture for producing pet foods. Then he established a West German affiliate for J. C. Decanx, the company that replaced Paris's decaying pissoirs with high-tech comfort stations and introduced elegantly stream-

lined bus shelters in glass and steel. While French publications were decrying the razing of Paris's redo-lent monuments, Krings-Ernst saw the evolution of an historic tradition that started with the Roman Emperor Vespasian, who had urnshaped urinals erected in Rome. The fledgling gallerist has since parted company with his French partner but still speaks enthusiastically about the aesthetics of "street

Kassel's mammoth international exhibitions. Between degrees in business administration at Cologne and Fontainebleau, Krings-Ernst chalked up two semesters of art history at the Ecole des Beaux Arts

While preparing for a job on the New York Stock Exchange, he made the rounds of Manhattan studios. The year was 1969, and what he calls "the Coca-Cola culture" was bubbling, "A constant high," he recalled, in his brisk, telegraphic style. "A rush. The first galleries moving downtown. Cage and Cunningham. Concerts by Phil Glass. Parties at Warhol's Factory. For the first time, I found contact to my own generation."

Thomas Krings-Ernst and the former factory he has turned into a gallery.

Meanwhile, despite his student budget, he had begun to collect prints and drawings by Jasper Johns, Donald Judd, David Hockney, Christo, Roy Lichtenstein and James Rosenquist. But when he applied for an apprenticeship at the Maeght Foundation, he was advised that being a gallerist was not a job but a life commitment. It was

too early for that, he decided, so he became assistant to a director of the French bank Crédit Industriel et Commercial. His conviction that beauty and functionalism need not be antithetical helped sell his bus-shelter pro-

ject to the Germans. He offered free installation and maintenance Krings-Ernst's financial adven- as well as a cash premium in exturing and his passion for painting change for the right to use a portion. All were accompanied by handand sculpture have long enjoyed a of each shelter for advertising. Co-somely boxed catalogs. He plans peaceful coexistence. His initiation logne, Hamburg, Saarbrücken, six exhibitions a year, and will pick into the fine arts came two decades Bremen and Ludwigshafen signed on but in D long-standing monopolies and the project soured.

He and his wife, Ilana, a Russian anesthesiologist, had bought a dis-used factory in southern Cologne in 1981, simply because they admired early industrial architecture. Krings-Ernst was also intrigued by the multiple uses to which such structures were being put in the United States — "from ateliers to discos to low-cost housing." In 1982 he made 800 photographs of such projects, in hopes of produc-ing a book.

Instead he found himself in the more active role of conservationist.

Dozens of Cologne's artists had been producing and exhibiting their work in an old chocolate factory. When their refuge was threatened with the wrecker's ball, Krings-Ernst drummed up support to save part of the historic struc-

In nearby Engelskirchen, a 19thcentury wool warehouse in a spa-cious park was to be demolished to make room for a new city hall. Krings-Ernst organized sit ins and mobilized teams of journalists and architects to attend meetings of the city council. The warehouse is being recycled as municipal offices, an industrial museum and loft-style

him to begin converting his factory. If further impetus was required, he had to look no farther than the nearby Kunstvereine. These local art associations are committed to presenting young artists from the region, and often provide spring-boards for new talent. In 1984 the Kunstvereine arranged a nation-wide exchange of shows. "When I saw what was emerging throughout Germany," Krings-Ernst recalls, "I knew I had to be part of this proStraus:

ARTS/LEISURE

The Importance of Being Motherwell

1 1 1 2 2 1

By Douglas C. McGill New York Times Service

DETERBOROUGH. New Hampshire - In a ceremony marked by speeches that provoked laughter and tears, the artist Robert Motherwell received the Mac-

Motherwell's acceptance speech, and the speech in which the sculptor Varujan Boghosian introduced him, described with humor and some sadness the difficulty of making statements about the human condition through the visual arts especially abstract art.

Motherwell, now 70, was a key southern New Hampshire.

The MacDowell Colony, founded in 1908 by the widow of the American composer Edward Mac-Dowell, is a year-round working retreat for artists, writers and composers. Its scholarships offer the chance to work for six-week stints in secluded cabins scattered over 400 wooded acres (160 hectares) in

al Arts Club in New York and the University of Salamanca in Spain, Then Boghosian began to de-scribe the difficulty he had had in preparing the speech. The prob-lem, he suggested, lay mainly in describing the medium of pigments-on-canvas in the medium of

recent years from the Pennsylvania

Academy of Fine Arts, the Nation-

Copland and Edgard Varèse.

The award speeches began typi-

It was especially difficult, Boghosian said, to describe the feeling of "shock" he recently received while poring over a book of Motherwell's paintings. He said that while looking at the works — especially the violent clashings of white and black — he had left an overwhelming sense that their creator was a being far different from the quintessentially civilized person who sat behind him on the stage.

"I warn you, do not buy this book," Boghosian said, holding the volume aloft. "It is terrifying. I was joited because this kind, wonderful, generous man, which we know him

my studio," Motherwell said. "I am not a performer. I make symbolic ty and Thornton Wilder, and the expressions of the human experiomposers Elliott Carter, Aaron ence on flat surfaces, made with burnt sticks, or sticks with chunks of animal hair tied on one end and dipped in colored liquids.
This experience is as primal and

cally, with Boghosian reading from a list of Motherwell's degrees and accomplishments, which include a natural as moving one's body, or uttering sounds of anger or glee. It is so natural that I am still surphilosophy degree from Stanford University in 1937 and awards in prised that children, at the age of 5 or 6 years, give it up."

In an interview before the award ceremony, Motherwell said that Modernist painting, as he understood and attempted to practice it, was a means of representing truth in the medium of paint - as Einstein had done in the medium of mathematics, as Beethoven had done with music, as Freud had done with words.

"The Freudian part is the diffi-cult part, which is that things are not what they seem to be," Mother-well said. "And how to paint that which is not what it seems to be is a

the pigments is interesting, Ivory black, like bone black, is made from charred bones or horns. Sometimes I wonder, laying in a great black stripe on a canvas, what animal's bones or horns are making the furrows of my picture."

Motherwell's "At Five in the Afternoon" (1949).

SALZBURG — The 1985 Salz-burg festival is unlikely to go down as a vintage year. The open-ing was clouded by a widely report-ed incident in which the Italian stage director Piero Faggioni slapped one of the festival administrators during rehearsals for Ver-di's "Macbeth." The other main event at the Grosses Festspielhaus — a breathtakingly dull and tradi-tional "Carmen" staged and conducted by Herbert von Karajan featured a first-rank cast, most of whom had already sung and acted the same roles better elsewhere.

Both operas were presented with the kind of extravagant visual spectacle that has become something of a cliché in Salzburg's largest auditorium, and that goes down well with the festival's rich, conservative monic Orchestra in the pit, neither "Macbeth," a holdover from last ear's festival, nor "Carmen," origmusical-dramatic whole.

Events next door at the Kleines Festpielhaus, as so often in the past, produced the most satisfying artistic results. The new production. was "Capriccio," Richard Strauss' last stage work. In spite of the strong historical connections between Strauss and Salzburg — un-derlined anew in an exhibition mounted for the festival at the Schloss Arenberg — "Capriccio" has been seen at only one previous Salzburg festival, in 1950, when Karl Bohm conducted four perfor-

The work articulates Strauss' thoughts on the role in opera of word, music and production, which he threads into the chit-chat and amorous games of a Parisian salon in the 1770s. The conversational nature of the work, and its length - two and a half hours without a break -- have given it the reputation of a connoisseur's piece, but it has achieved greater popularity in

and the designer Andreas Reinhardt. The palatial, clear-cut framework of neoclassical glassand-marble decor makes discreet reference to fashionable trends in the visual arts from the first three decades of the century. The costumes are an equally effective reminder that the widowed Countess and her entourage are at the fore-front of 1930s fashions.

One by one, however, each character changes back into the cos-tumes of the 18th century setting intended by Strauss, until by the Italian duet halfway through the opera, even the servants appear to have been lifted straight out of the andiences. In spite of the peerless Ancien Regime. The effect of these contribution of the Vienna Philhar—skillfully plotted transformations is disconcerting. They add one further anachronism to a work overflowing with anachromistic music inally staged for Karajan's Easter and conversation, yet Schaaf never festival, added up to a cohesive really succeeds in making them seem anything more than a clever theatrical ploy.

action to this century.

That is the approach adopted at impetus here stems from the way Salzburg by the West German film the Vienna Philharmonic handles and stage director Johannes Schaaf Strauss' sumptuous orchestral textures - this really is vintage playing - and from Anna Tomowa-Sintow's portrait of the lonely at the Felsenreitschule. Countess, her beautiful singing only occasionally marred by lapses into shrill tremolo.

Elsewhere, the pacing of the mucast is excellent: Manfred Jung-range of modern stage and lighting of the bass line in particular draws wirth as La Roche cuts a strong effects, to illustrate the divide beprofile in the theater director's monologue; Trudeliese Schmidt's rich-toned Clairon is slinky, sexy actressy way; Wolfgang Schöne's ment by Hans Werner Henze, individual performances at its cen- is that ter, the production has a chance to are not in Monteverdi's handwrit-

The times were precarious. The monarchy was not yet very strong in France and the country was divided by the religious issues of the Reformation, Ronsard took a polemical stance on the Catholic side and, being a confirmed supporter of the monarchy, also wrote a long epic work aimed at glorifying the French kings. The platonic ideals of the Renaissance, fostered by Ronsard, sixth son of Loys de philosophers fleeing the Arab conquerors of Constantinople, had by then reached France, where they

All this is handsomely illustrated in the exhibition by means of taprince died, spitting blood, at the pestries, paintings and a large quantity of drawings and prints. . These help one understand the age frailer and more vulnerable than

Ronsard wrote some memorable had to feast my eyes on the heart poetry, especially love poems that every French schoolboy must learn, but he was insufferably prolific. The prestigious Pléiade edition of his works has more than 2,000 pages, which no one today can hope to read for pleasure's sake. But by setting Ronsard's writing in the artistic context of the day, and especially that of the mythological subjects so abundantly dealt with in art, the show does help one understand what made even his more garrulous works seem relevant in his day.

Resurrected 'Maometto II' Opens Pesaro Rossini Fest

By William Weaver PESARO, Italy — The Rossini Opera Festival has opened its sixth year with a highly successful and highly enjoyable production of "Maometto II," a serious opera dating from the composer's crucial, fertile Neapolitan period.

Though Pesaro's festival has ranged freely through the Rossini canon, its attention to this area of the work has been particularly valuable, for until fairly recently these operas were largely neglected. "Maometto II" was fairly well known, but not in its original version of 1820. It has been revived, and recorded, in the 1826 version that Rossini created for Paris, with various suppressions and additions, then entitled "Le Siège de Corinthe."

This tragedie lyrique is a splendid work, but the Neapolitan predecessor is its own kind of masterpiece. In "Maometto" there is ample splendor and pageantry but also an intensity of individual character that seems somewhat diluted in the grand French version. Like most of Rossini's serious Neapolitan operas, "Maometto" was written for Isabella Colbran (later to be the composer's wife). Still, it is no star vehicle - or, rather, it is not a vehicle for a single star. Anna, the Colbran role, is surrounded by

dia's Anna, loving and doomed, exerted waif-like appeal one moment and imposed noble authority the next. In the first act, the lower

part of her voice lacked body, but it was warm and full for the towering final scene. As Maometto, the enamored infidel, Samuel Ramey confirmed his insight into Rossim's vocal demands and his ability to meet them. He also confirmed his popularity with the Pesaro audience, which awarded him a long ovation. Another ovation was well-carned

by Lucia Valentini Terrani, in the trouser role of Calbo. Valentini Terrani has a dramatic affinity with these Rossini warriors, as she showed a few seasons ago with her stirring Tancredi. Again she was in good form, negotiating the fiendish coloratura with style and panache. Chris Merritt brought musicality and taste to his interpretation of the role of Erisso, Anna's father. In the small part of Condulmiero, the young William Mattenzzi displayed a lyrical and supple tenor. Claudio Scimone conducted his new critical edition of the score with obvious affection and knowledge, though a little more bite would have helped.

Pier Luigi Pizzi designed an impressive, versaule set (a large columned courtyard), whose leaden tone was an ideal background for his rich costumes. His staging was impeccable, supporting the music, assisting the singers, never nudging or provoking the audience: an exin Pesaro, all were in the hands of gifted specialists. Cecilia Gasof gifted specialists.

Prices Mixed in Quiet Trading

NEW YORK — Prices on the New York Stock Exchange closed mixed Friday in light trading as investors focused their attention on takeover situations.

28,582,570 31,844,970

Late buying helped the Dow Jones industrial average finish the day with a slight gain of 0.22 to 1,318.32. For the week, the Dow added 5.60. Declines outnumbered advances by an 8-7 ratio. Volume shrank to 75.27 million from 90.6

Analysts said the market drifted in a general downtrend with takeover situations generating much of the day's activity. They said advances earlier this week had amounted to a normal, reflex reaction to an "oversold" market Some participants contended that, in face of negative economic news, the market had been doing well by holding fairly steady.

USF&G Corp. was the most active NYSE-listed issue, easing % to 33½. Sears followed, up % to 35%.

Transway International Corp. was third, adding 1½ to 44%. Nortek Inc. sweetened its hostile bid for the company to \$45 a share from \$40. Nortek eased ½ to 16%.

Revion, the target of a hostile takeover bid by Pantry Pride Inc., fell % to 46%. Pantry Pride was unchanged at 7%. After the market closed,

Pantry Pride said it intended to sell "substantially all" of Revlon assets except the beauty SCM Corp., the target of a hostile takeover bid by Hanson Trust, advanced 1% to 66. After the close, SCM said its board would meet Sun-

day to consider the offer. In auto stocks, General Motors lost ¼ to 66% Ford 1/2 to 43%. Chrysler inched up 1/4 to 36%. All three companies reported lower mid-August ar sales.

Phibro-Salomon fell 1¼ to 39% after a major brokerage house lowered its opinion of the firm to "neutral" from "attractive." Tektronix was the session's biggest loser, fall-ing 4% to 57% after it said its first-quarter earnings probably would not match those of

MCA was the day's biggest winner, advancing 3% to 67% amid rumors that it had resumed talks with RCA Corp. RCA has expressed interest in acquiring MCA.

Among technologies, IBM inched up % to 126%, Digital Equipment lost 1 to 99% and Cray Research advanced 1% to 49%.

Among other blue chips, AT&T lost ¼ to 1¼, U.S. Steel eased ¼ to 30%, General Electric dropped % to 60, and American Express declined % to 41%. Eastman Kodak added % to

Japan, the United States Need Their Interdependence

By KIYOHIKO FUKUSHIMA

New York Times Service EW YORK — Despite some progress by Congress in reducing federal expenditures in the 1986 fiscal year, the U.S. budget deficit remains high and could easily the U.S. budget deticit remains high and count easily balloon back to the \$200-billion range in the event of a cyclical economic slowdown. Thus, the now familiar pattern of high interest rates, overvalued dollar and bloated U.S. trade deficit also is certain to continue in the years ahead. Frustration over this situation also will continue to strain the economic relationship between the United States and Japan.

Each country tends to blame the other's macroeconomic poli-cies as the major cause of the imbalance, but the remarkable fact is that both the Japanese gov-ernment and the Reagan ad-

Reducing the degree

of interdependence

the United States

severely.

would hurt Japan and

ministration are motivated by essentially the same economic philosophies,

Over the last decade, Japan has worked hard to reduce its budget deficit by cutting spending without a major tax increase. During the last five years the Reagan administra-

tion has been trying to do the same. Ironically, Japan's mild success in controlling its budget deficit has complicated U.S. efforts to restore fiscal balance.

In contrast to its position at home, the Reagan administration has been urging Japan to stimulate domestic demand. But since the movement toward reducing the budget deficit and reforming the government is deeply rooted in Japan, chances of such change

in government is deeply rooted in Japan, chances of such change in Japan's macroeconomic policy are slim.

Japan's current drive for smaller government started around 1975. The burgeoning budget deficit after the first oil crisis set some thinkers in Japan to publish an article, "Suicide of Japan," which inveighed against the growing tendencies of dependence on government among the younger Japanese. The article called for self-reliance, discipline and hard work to build a better future.

get deficit soon became public enemy No. 1. Successive Japanese prime ministers tried different methods to combat it. Takeo Fukuda, who took office in 1976, tried to grow out of the deficit by saintly large transfer or several and the saint of the deficit by stimulating the economy through more spending based on the locomotive theory popular in the Carter years, and failed. Masayoshi Ohira's proposal for a tax increase led to an electoral setback for his party in 1979, a year after he took office.

Logically, there was no choice left for Mr. Ohira's successor but to cut spending. Since Zenko Suzuki pledged to pursue this path when he took over in 1980, the movement for smaller government became official government policy. An authoritative council on government reform was set up with wide public

After Mr. Suzuki resigned in 1982, his successor, Yasuhiro Nakasone, at one time the state minister for government reform, became the advocate of this political and economic thinking, a factor that helped him to succeed Mr. Suzuki. With this background, Mr. Nakasone was able to freeze or reduce all government spending in nominal terms for three consecutive years

except for military expenditures and a few other items.

This has gradually reduced the government's borrowing as a percentage of gross national product from 6 percent in 1979 to 3.8

Japan's drive for smaller government has more than 10 years of consensus building behind it. For Mr. Nakasone to reverse course in response to foreign political pressures might well be a formula As the Japanese government's borrowing decreased, surplus

private funds became available for overseas investment. At the same time, Japanese corporations sought to increase their exports to compensate for reduced government spending. In the United States, in contrast, a dramatic jump in interest

Icahn Has 50.3% Of TWA

Move Apparently Assures Takeover

Compiled by Our Staff From Disputches NEW YORK — Carl C. Icahn, the New York financier, raised his interest in Trans World Airlines to shares on Friday, a move that appeared to give him a victory in his struggle for control of TWA.

Mr. Ican raised his stake from

47 percent, boosting his holdings to about 17.49 million shares of the approximately 34.5 million shares outstanding a spokesman said af-ter financial markets had closed for the week.

The spokesman, Peter Rosen-thal, refused to discuss Mr. Icahn's plans, and Mr. Icahn was unavail-

Earlier in the week, after the TWA board refused to adopt proposals that would have been favorable to a rival bidder, Texas Air Corp., Mr. Icahn said he would seek to seal control of TWA by increasing his holdings to more

It is believed that he purchased a 930,000-share block of TWA stock that traded Friday at \$22.50 a

TWA ended the week at \$22.375 share, unchanged from Thurs-

Mr. Icahn previously offered to buy the TWA shares he did not already own for \$24 a share in cash, but he also said he would enter the market to buy shares at more favor-Texas Air offered \$26 a share for

TWA, but was opposed by the company's unions, which negotiated wage concessions with Mr.

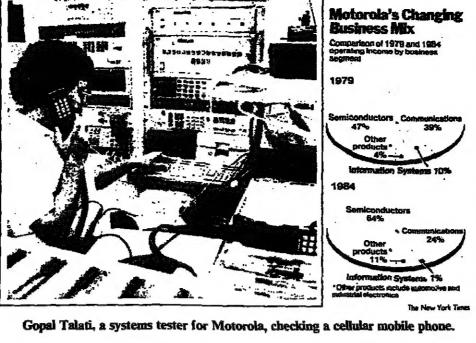

Mr. Icahn reached the agree on Aug. 5 with leaders of TWA's two largest unions, the International al Association of Machinists and Aerospace Workers and the Airline Pilots Association.

The agreement, calling for em-ployee concessions in return for 20 percent of the company's stock, required Mr. Icahn to take countrol of TWA and keep its assets largely intact during the three-year pact. Directors of TWA decided on Tuesday not to block Mr. Icahn's offer and refused to grant Texas Air options to buy the airline's valuable assets.

Some Wall Street sources had said that Texas Air Corp. and Icahn representatives had been negotiating an agreement under which Texas Air would drop its

view Thursday that the talks with offered only on 1985 models in Texas Air were going on. (AP, UPI, Reuters) len now by 600,000 cars that were

Motorola in the High-Tech Market

Analysts Optimistic After Decade of Ups and Downs

By Steven Greenhouse New York Times Service

CHICAGO - For many middle-aged Americans, the name Motorola evokes memories of their first television set or car radio. These days, however, Motorola is making its mark in the high-tech world of semiconductors, computers and mobile

But Motorola's technological expansion in the past decade has not always gone smoothly. And today, the company is plagued with problems in the very businesses that it is counting on for fast growth in the future.

Low-priced cellular mobile phones from Japan have produced losses for Motorola's mobile-phone division, notwithstanding its 40-percent market share. Four-Phase Systems Inc., Motorola's computer unit, which is also in the red, laid off 500 employees last week. And a worldwide slump has hurt Motorola's semiconductor division even though that unit is weathering the downturn far better than many of its competitors.

As a result of these problems, Motorola's earnings dropped to \$26 million in the second quarter, from \$98 million in the second guarter of 1984.

Despite the turbulence in the marketplace, Robert W. Galvin, Motorola's chairman, boasts that the company, which had revenues of \$5.5 billion last year, will remain on a fast-growth track. In 1980, Motorola had net sales of \$3.3 billion.

"I suppose that by the turn of this decade the corporation should be doing something on the order of \$10 billion worth of business and some-

time in the middle '90s potentially double that," said Mr. Galvin, 62, the son of Motorola's founder. Mr. Galvin scoffs at suggestions that any of his

company's alling divisions face long-term prob-lems. "The businesses that we're engaged in still have a tremendous life ahead of them," he said from Motorola's headquarters in Schaumburg, Illi-nois, 30 miles (48 kilometers) northwest of down-On Wall Street many analysts share his opti-

Guinness Wins Struggle for **Control of Bell**

By Bob Hagerty ternational Herald Tribu

LONDON - Guinness PLC announced Friday that its £360-million (\$504-million) takeover bid had succeeded in gaining control of Arthur Bell & Sons PLC, a distiller of whisky based in Perth, Scotland. Guinness, a brewing and retail-ing company based in London, said acceptances counted so far had raised its stake in Bell to about 65

The victory by Guinness ended a two-month struggle that was more bitter than the company's famous black stout. The two companies attacked each other through press releases and full-page newspaper advertisements with a ferocity unusual even by the aggressive stan-dards of recent British takeover

Guinness made a slogan of the phrase, "Bells has lost its way." Bell retorted that "Guinness's publicity masks its basic weaknesses in business and management

methods." But Guinness was able to score points by stressing the sluggish growth of Bell's earnings per share in the past three years, its failure to make rapid gains in the U.S. mar-ket, and a decline in its share of the British market, although Bell remains the biggest-selling whisky in

In recent years, Guinness has been trying to reduce dependence on the slow-growing beer business, which provided 85 percent of the company's operating profit in the six months ended in March. Thus, many observers initially were surprised that Guinness chose to pursue a company in an even more stuggish business, Scotch whisky.

Gourmet Stores To Be Acquired

International Herald Tribune LONDON — Ernest Saunders, chief executive of Guinness PLC, said late Friday that the company expected to acquire Hediard SA, a Paris-based maker of gournet foods, for about £10 million (\$14 mil-

He said the company was be-ing acquired from the family of Philip Brunon, who would continue to manage the business. The sale is subject to French government approval, but Mr. Saunders said he expected to complete the transaction

He said Guinness aimed to expand sales of Hédiard products in the United States.

But London investment analysts say the acquisition will give Guinness another steady source of profit and provide the financial strength needed to pursue more aggressively its expansion in higher-growth ar-eas, such as retailing and health products.

"It's easier to do things if you're starting from a larger base," said Colin Humphreys, an analyst at the stockbrokerage of Scrimgeour

Vickers & Co.

The combined company will have annual sales of about £1.5 billion, and John Spicer of Grieve son, Grant & Co. forecast that it would produce pretax profit of £140 million in the year ended in September 1986, up from the £85 million Guinness is expected to report for the current fiscal year.

The acquisition of Bell marks the peak of a diversification drive that has extended Guinness into operawent up from 12.1 percent to 14
percent. Analysts believe that Ford
and Chrysler gained at GM's exinsist that this drive is better founded than a pell-mell diversification pursued by the company in the 1960s and 1970s.

> marketing executive for Nestlé SA who took over as chief executive of Guinness in 1981, spent much of companies, extracting the company confectionery and plastics. The company continues to publish its Book of Records, however.

For Crude Said to Rise

NEW YORK - The Soviet Union, the world's largest oil producer, has notified European customers that it is raising the price of its main export crude oil by 25 cents a barrel to \$26.25, effective Sept. I, industry sources said Fri-

The move by the Russians, who keep prices closely in line with mar-ket conditions, followed an increase of 50 cents a barrel for Urals crude in mid-August.
The Soviet Union does not pub-

licly announce its pricing decisions for oil, one of its main sources of hard currency. The sources said their companies had been informed of the latest price change by telex

John Lichthlau, executive director of the Petroleum Industry Research Foundation in New York, said the move "shows the market is quite strong at the moment." Oil prices on world markets have been creeping higher in the past month.
Urals oil for Angust delivery was
quoted Friday in the spot or noncontract market at \$26.45 a barrel,

according to Telerate Energy Service, a private market information Mr. Lichtblau said the higher prices are not a sign that demand for oil has suddenly picked up, but rather reflect the low level of supplies available as the fall heating

cason nears. The Organization of Petroleum Exporting Countries has been holding its production down in an attempt to defend official prices. Arabian light oil, the OPEC

benchmark, was quoted at \$27.45 a barrel on the spot market Friday. A month ago, Arabian light crude was hovering around \$27 a barrel. The official price is \$28 a barrel.

Soviet Price U.S. Banks Tighten Controls After Hutton Case

By Steven E. Prokesch New York Times Service

NEW YORK — Until E.F. Hutton & Co. pleaded guilty in May to overdrafting many of its bank checking accounts, a sort of laissezfaire attitude existed in the cashmanagement relationships of many U.S. banks and corporations.

The bankers knew that corporate clients were testing the limits of electronic funds transfers and other sophisticated systems to maximize interest income on their cash. But they trusted that the new breed of corporate cash managers would not deliberately deceive them.

Now, however, that trust is fast disappearing. Fearful of being ex-ploited, small banks are beeling up their techniques for keeping tabs on corporate accounts. Many big banks are finally putting to use the monitoring systems that already have. And both bankers and corporate officials are taking no chances about what is, and is not, permissible under cash-management ar-

As a result, they are detailing the exact nature of their relationships. "Bankers are being more vigilant" and "will be more circumspect and less trusting of large in-stitutional accounts in the future,"

He said that managements at both large and small banks had been guilty of "management over-

already had in place to monitor their corporate customers. At the same time, "a number of corporations are taking a hard look at all their cash-management practices, to make sure they're not doing some of the practices that were listed in the E.F. Hutton case," said Elliott C. McEntee, the Federal Reserve's associate director of opera-

sight" in not using the systems they

thing," but "we took a step back to look at what we were doing," said a cash manager at Southland Corp.,

Federal Reserve Board, was the ed the float by overdrafting its first to suggest that the Hutton case had caused other companies to act more conservatively in the way banks before depositing them in a they deposit and transfer funds. He major money center bank. Many of suggested, on July 16, that this might explain why the money sup-ply rose sharply in May and June.

But some bankers say the rise in corporate balances has much more to do with declining interest rates than Hutton. Instead of paying fees for a bank's services, many compapredicted George Luia, a vice presi-deat in the financial institutions balance and, in effect, compensate nies agree to maintain a minimum department of Melion Bank NA, a the bank for its services with the major provider of credit and oper-interest income that the bank can

> But since the Hutton case, some bankers say corporations are keeping more money in their bank accounts and appear to be more con-servative in their use of the "float" the time lag between when a check is written and when the funds are actually drawn from an

ve's associate director of opera-ns.

Hutton's principal offense was a scheme to create huge floats — said to be as much as \$270 million a day - without its banks' knowledge or consent, thereby providing Hutton interest-free use of bank funds. Exwho asked not to be named. cessive use of float without a bank's Paul A. Volcker, chairman of the permission is illegal. Hunton creatbank accounts and also by transferring funds through a series of small the small banks hurt by Hutton's scheme knew what was going on, but looked the other way because

companies drawing on uncollected funds since the Hutton deal," said John Shivers, chairman of Southwest Bank in Fort Worth, which

has assets of \$104 million. "Definitely, corporations are not being as aggressive in their drawdown practices as they used to be, because of E.F. Humon," said Zackie Wisdom, a senior vice president at Interfirst Bank Dallas NA. The bank's commercial demand deposits increased 5 to 6 percent in the months following Hutton's

guilty plea. And NCNB National Bank, which operates in North Carolina and Florida, has a similar explanation for why its corporate and com-mercial deposits rose 10 percent in the second quarter.

"I think cash managers are play-ing it a little more conservatively until everything settles with the Hutton situation," said Buddy Le-Tourneau, a senior vice president. "This has served as an attentiongetter, to say the least."

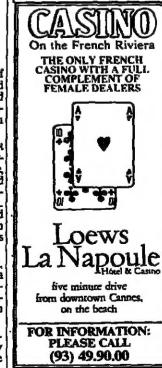

The Value Line provides OBJECTIVE EVALUATIONS of **AMERICAN STOCKS**

The Value Line Investment Survey continually reports on more than 1700 American stocks, it provides a vast amount of statistical history and forecasts, all of which are reduced by Value Line's computer-based programs to two simple, easy-to-apply indices: (1) The rank for Timeliness (Relative Price Performancle of the stock in the Next 12 Months) and (2) the rating for Safety (Price Stability of the stock plus financial strength of the company) financial strength of the company).

An introductory subscription to The Value Line Investment Survey brings you as a BONUS Value Line's 2000-page Investors Reference Service, with the latest reports, rankings, and ratings on over 1700 stocks, together with the 72-page guide, "A Subscriber's Guide." Then, every week for 12 weeks you and replace the corresponding reports in your Reference Service—for just \$75, about half the regular rate, providing you have not had a subscription in the past two years. Send payment along with name and address together with this ad to Dept. 513 0 04 will receive new reports on about 130 stocks, which update

Japan Reports Drop In Dependence on Oil

Reuter

TOKYO — Japan's dependence on oil as a proportion of all energy sources fell below 60 percent for the first time in 19 years in the year ended March 31, to 59.6 percent from 61.9 percent a year earlier, the Ministry of International Trade and Industry said Friday.

The agency said in its fiscal-1985 report on energy supply and demand that overall primary energy supplies rose 5.3 percent, to the equivalent of 436 million kiloliters of crude oil (113.4 billion gallons or 2.7 billion barrels), from 414 million in 1984.

Oil supplies rose to 259.6 million kiloliters in

Oil supplies rose to 259.6 million kiloliters in 1985 from 256 million a year earlier, but fell as a

1985 from 256 million a year earlier, but fell as a proportion of total energy supplies, it said.

Supplies of natural gas soared 28 percent, to the equivalent of 40 million kiloliters of crude oil in 1985, from 31.2 million a year earlier, accounting for 9.2 percent of total energy supplies against 7.5 percent, the report said.

Atomic power supplies rose 17.5 percent, to the equivalent of 35 million kiloliters in 1985 from 29.8 million a year earlier and accounted for 8 percent of the total against 7.2 percent.

Industry sources said Japan's oil dependence.

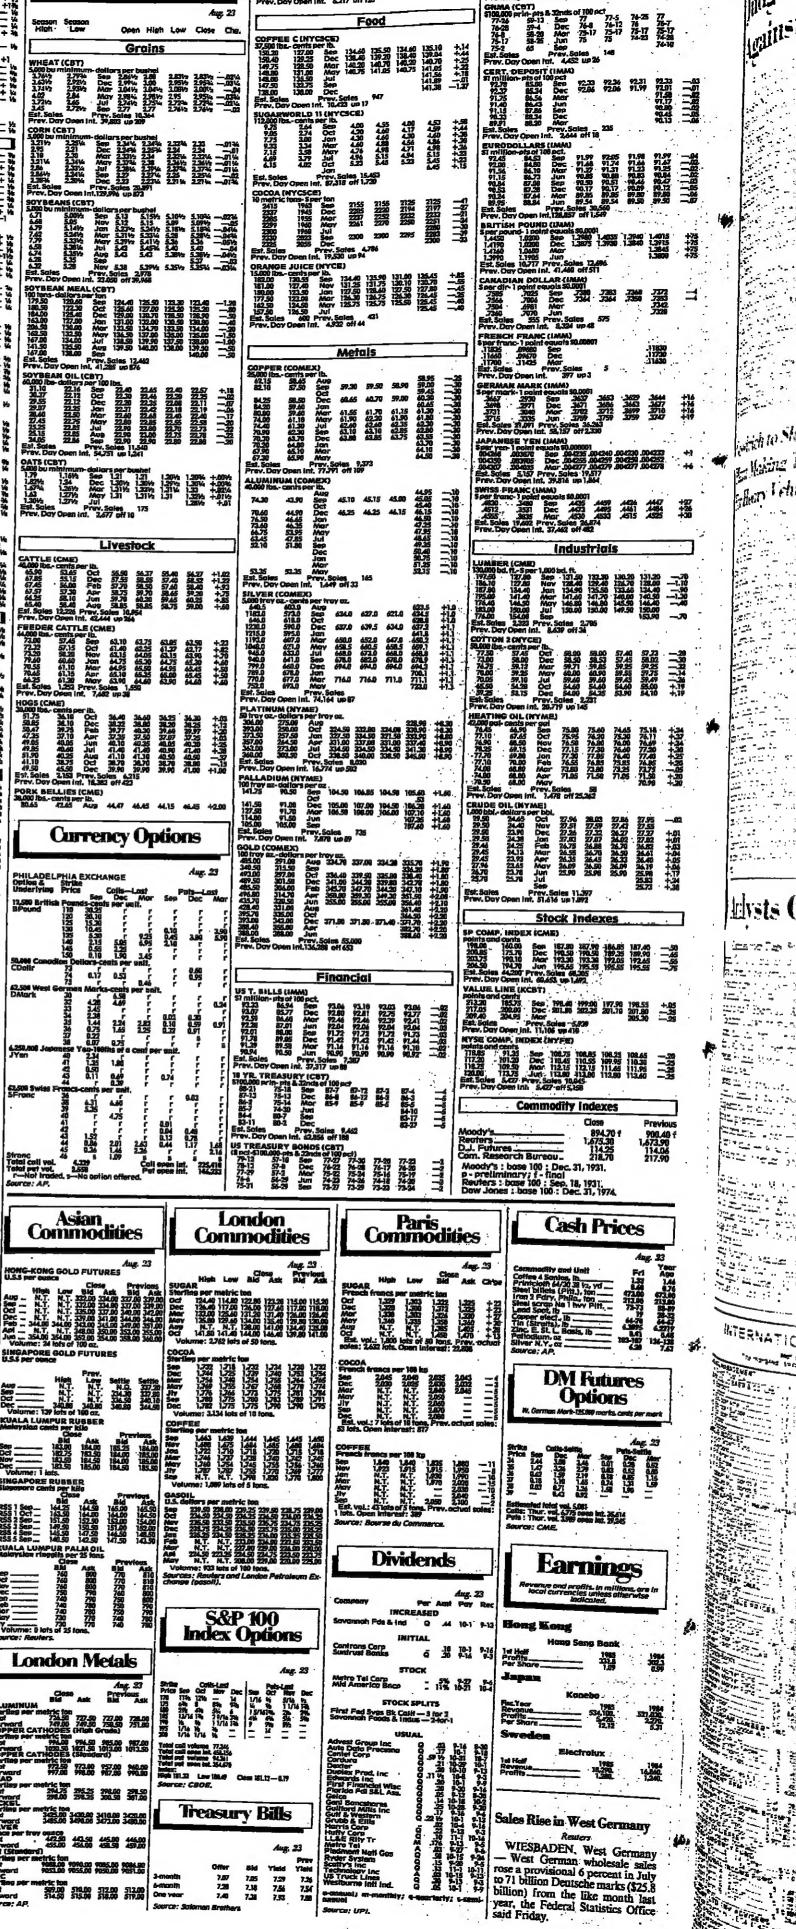

Industry sources said Japan's oil dependence hit a peak of 77.6 percent in the first oil-crisis year of fiscal 1974, but has steadily declined since then as a result of efforts to diversify energy sources and become more energy-effi-

The report said Japan has no need to change its 1983 long-term energy estimates and will continue efforts to secure reliable oil supplies. develop and introduce alternative energy resources and further promote efficiency.

Judge Suspends Suits Against Dalkon Maker

By Michael Isikoff

Washington Post Service
WASHINGTON — A loderal adge has suspended thousands of lawsuits against A.H. Robins Co. while he begins to sort out a thicket of legal issues raised by the company's petition for reorganization un-

der the bankruptcy laws.

In a hearing before Judge Robert
Merhige in Federal Court in Richationd, Virginia, on Thursday, lawyers for some of the women sumg
Robins over the Dalkon Shield
birth-control device protested the
bankruptcy filing and promised to bankruptcy filing and promised to

challenge it.
In addition, the National Women's Health Network, a Washington-based advocacy group, said it will petition Judge Methige to block the bankruptcy filing on grounds of fraud because Robins, but its comp admission is not an its own admission, is not an

solvent company, Although it is otherwise financially healthy, Robins said on Wednesday that it was filing for protection because it is unable to

Goodrich to Shut Plant Making Tires For Heavy Vehicles

MIAMI, Oklahoma — B.F. Goodrich said Friday that it would close a plant here that manufactures tires for farm equipment, large trucks and heavy machinery. About 1,900 employees will be affected by the February shutdown.

Foster Smith, a company spokesman, blamed foreign competition and depressed sales of specialty tires for Goodrich's decision to stop making radial truck tires, farm tires and large off-highway ma-

chinery tires. Mr. Smith said Goodrich tried to sell the Miami plant but no bayer Awas found. He said there still are it will form out all right. It was some potential buyers that have inevitable."

not yet been contacted. The plant, which has been operating for 45 years, is the only one of Goodrich's four plants that manufacture those tires. The others make mainly automobile replacement tires. Mr. Smith said that despite only "fair" sales for Goodrich's other products, the company's other three plants would not be affect- fective Friday, bringing total to

cope with an onslaught of lawsuits from women who claim they suf-fered pelvic infections, steribity, in-

voluntary abortions and other injuries after using the company's Daikon Shield intrauterine device. Robins, a 119-year-old company

that markets such well-known products as Chap Stick lip balm and Robitussin cough syrup, sold the Dalkon Shield to about 25 million women between 1970 and 1974, when the device was withdrawn from the market. Since then, the company and its insurer have paid out \$378.3 million to settle 9,230 of the lawsuits.

But another 5,100 suits are pending, and "the company anticipates a substantial number of new cases and claims in the future," Robins Some legal experts said Thurs-

day that the bankruptcy filing could end up backfiring against the company. These experts said that, because of recent changes in the law, the company ultimately will be unable to achieve the relief from huge punitive damage awards that

Manville Cosp., which has been cited as a precedent for the Robins action, filed for Chapter-11 protection three years ago to get out from under more than \$10 billion legal claims for asbestos-related health problems. But the company earlier this month agreed to a settlement that will provide an open-ended fund of \$2.5 billion to pay off

The filing did have the initial

effect of giving Robins the breath-ing time it wanted, however, "My understanding of the law is that everything is stayed in every court," the judge said in a previous-ly scheduled hearing.

"It was obvious this was coming," Judge Merhige told about 24 Jawyers at the hearing, "You knew it, you knew it, you knew it. I think

Toyota Says Net Increased 22.5% In Fiscal 1985

TOKYO — Toyota Motor Corp. said Friday that net income for the parent company rose 22.5 percent in the fiscal

year ending June 30.

Net income was 308.31 billion yen (\$1.30 billion) in 1985 compared with 251.57 billion yen in fiscal 1984. Sales rose 10 percent to 6.06 trillion from 5.47 billion, Toyota said. Toyota blamed sluggish de-mand, particularly in the first six months, for a 1.7-percent

year-to-year decline in domes nc sales. Exports increased 11.2 percent to 1.90 million partly as a result of increased sales to the United States and China, Toyota said. The company predicted only a 3.9-percent year-to-year sales

increase in the current fiscal year, partly because of expected lowdowns in the Japanese and U.S. economies. The export picture will re-

nain uncertain due to the sinegish market situation in the developing and oil producing countries, Toyota said.

Murdoch Petition Causes Speculation

Los Angeles Times Service NEW YORK - A recent peti-

tion filed with the Federal Communications Commission on behalf of Rupert Murdoch has ignited specu-lation that the publisher intends to close his newspapers in New York and Chicago.
The petition was filed Tuesday

concerning Mr. Murdoch's proposed takeover of six television stations from Metromedia inc. Sta-tions in New York and Chicago are included in the proposal and Mr. Murdoch has asked the FCC to temporarily waive regulations pro-hibiting ownership of a broadcast outlet and newspaper in the same

In what appeared to be a reference to Mr. Murdoch, the petition read in part: "If sufficient pressure to sell is enemed, either the buyer or seller might very well cease operations of the papers and liquidate its physical assets." The petition caused speculation that Mr. Murdoch would sell the

York Post rather than be forced to sell them for less than what he believes they are worth. On Thursday, Mr. Murdoch's at- by Warner-Amex Cable Communi-

statement of intent, a threat or a to identify other potential buyers.

Chicago Sun-Times and the New

would liquidate," Mr. Squadron

The misunderstanding arose, he said, because of vague wording used in his 10-page written response to petitioners opposing Mr. Murdoch's intended \$1.55-billion acquisition of the Metromedia sta-

promise" to sell the newspapers. sary to sell all or part of the compa-"We never told the FCC that we ny, The New York Times reported. New Bond Bid

The Thursday statement was a reversal of the company's previous public position and it appeared to friendly agreement.

Perenchio, two Hollywood produc-ers, last month offered \$1,000 a share, or \$453 million, for the closely held company. On Monday, they increased the offer to \$1,250 a troit News, said that it had told share for a minimum of 51 percent shareholders that it might be necesin a bid that expires Aug. 30.

Warner Ends Talks on Sale of MTV

NEW YORK - Warner Communications said Friday that it had ended negotiations on a proposal by Forstmann Little & Co. to buy the two-thirds share of MTV Networks Inc. that Warner controls.

stock is publicly held. Jeffrey Holmes, a Warner spokesman, said the company was involved in other negotiations to sell its MTV stake, which is owned torney, Howard Squadron, said cations, a 50-50 joint venture with that the publisher had not made "a American Express Co. He declined

Warner said recently that it would exercise its option to buy out its partner for \$450 million.

Warner Amex is the sixth largest U.S. operator of cable-television systems. It owns 19 percent of another cable-TV programming com-pany, Showtime-The Movie Chan-

Forstmann Little, a privately held investment firm that specialoffer nor continue negotiating with Warner "in any respect."

Castlemaine Defers Consideration of

BRISBANE Australia - The board of Castlemaine Tooheys Ltd. acknowledge that ENA was for sale brewers said Friday that it would and probably would try to reach a consider an enhanced takeover offer from Bond Corp. Holdings Ltd. Norman Lear and A. Jerrold after discussions on a possible counterbid.

Bond announced earlier that it had increased its offer to 8.25 dollars (\$5.80) a share from 7.50 dollars and said CTL's largest share-holder, Allied-Lyons PLC, had accepted the offer for its 24.87percent interest in the compa The Allied-Lyons' sale lifted Bond's stake in CTL to 42.87 percent. Its target is 146,5 million is-sued shares of CTL.

CTL said Thursday that it was holding discussions with a major MTV Networks provides music unnamed company that could lead videos and children's programming to a bid for CTL that would be for cable-TV. The rest of MTV's significantly higher than Bond's previous offer.

Westinghouse Acquisition United Press International

PITTSBURGH - Westinghouse Electric Corp. has purchased the assets of Gladwin Corp., a com-pany that services and repairs molds for continuous casters for izes in taking companies private, molds for continuous casters for said it would neither extend the the steel industry, it was announced Friday. Terms were not

INTERNATIONAL POSITIONS

A leading testing and inspection company has an opening for a

DIVISION MANAGER/ CONSUMER PRODUCTS

in the Far East.

This challenging assignment includes responsibility for execution and development of all inspection and testing activities in the field on consumer goods.

This important key-position calls for a first-rate academic background in chemistry and at least five years of experience in a managerial position involving laboratory activities.

Candidates between 30 and 40 years of age, having the necessary qualifications, are requested to send their application to:

Box D-118, International Herald Tribune, 181 Ave. Charles-de-Gaulle, 92521 Neuilly Cedex, France.

Analysts Consider Motorola's Problems to Be Temporary

have a reversal in the semiconductor slump in three to six months on the outside," said Jay W. Cooper, an analyst with F. Eberstadt & Co. The industry is down probably 15 percent plus, and next year we think it will be up 15 percent in revenues. We think Motorola will

do at least as well." Several analysts predicted that Motorola's hicrative business of selling electronic products to automotive and government costomers - which represented 14 percent of last year's revenue - would also grow at more than 15 percent annu-

Many analysts say Motorola most be doing something right be-cause its semiconductor division has navigated the shump without the huge layoffs many of its competitors have had.

Helping Motorola weather the storm was the fact that it introduced its highly acclaimed 32-bit microprocessor, the 68020, at tion of microprocessors that will give desk-top computers a great deal more speed and processing power. A microprocessor is a sophisticated logic chip that serves as a key thinking component of mi-

crocomputers. I think the 68020 is the best architecture out there for full 32-bit microprocessors," said Eberstadt's Mr. Cooper, who noted that Apollo Computer Inc. and Hewlett-Packard Co. were using it in their workstation computers, often for computer-aided design. "But I think it will get some very strong competi-tion from Intel when its 386 comes

Making life tougher for Motor-ola is International Business Machine Corp.'s part ownership of In-tel Corp., whose 16-bit microprocessor was chosen for IBM's personal computer. Speaking about the IBM-intel link, Mr. Galvin said: "That affects the vol-

FOOD LEGUME CROP MICROBIOLOGIST

The International Center for Agricultural Research in the Dry Areas (ICARDA) with headquarters in Aleppo, Syria, invites applications for the position of a Microbiologist in the Food Legume Improvement Program (FLIP). The Microbiologist will conduct research within a multidisciplinary team in the FLIP on rhizobiology with the ultimate aim of improving the symbiotic nitrogen fixation in the dry land agriculture eropping systems through lentils, chickpeas and fababeans.

- RESPONSIBILITIES To study naturalized populations of Rhizobium spp, unertake Rhizobium straia selection and testing for suitability as inoculants, establish Rhizobium straia collection and use it in collaboration with legume breeders, in Rhizobium strain x host genotype studies for improved hiological nitrogen fination, and study long term persistence of the Rhizobium strains in field environments. To develop suitable inoculants and inoculation techniques
- To work closely with the agronomists and erop-physiologists in the FLIP and Farming Systems Program in studying the biological nitrogen fixation in field experiments evaluating novel production techniques and genotypes and long term rotational effects.
- To arreaghen contacts with national programs and help to en-hance their efforts on symbiotic nitrogen fixation studies. To-wards this end, to conduct special training programs in rhizobio-logy and to participate in the general food legume residential training courses.
- lence to augment the local rhizobiological research effort at ICARDA.

QUALIFICATIONS A Ph.D. in microbiology with at least 5 years experience of research in rhisobiology. Specialisation in the field of Rhizobiana ecology would be desirable. Experience of working in developing countries with lentil, faba bean or chickpea would be considered desirable, and previous involvement in training activities would be useful. An essential prerequisite is competence in spoken and written English, and a knowledge of Arabic and/or French would be valuable.

CONDITIONS OF APPOINTMENT

The candidates would be based in Aleppo. North Syria and would be The candidates would be based in Aleppo, North Syria and would be responsible to the leader of the Food Legume Improvement Program. The candidate is entitled to an international tax-free salary based on background and experience; use of ear, allowance towards housing annual home leave; non-contributory medical insurance scheme; pension fund.

APPLICATION

Candidates should send 2 copies of their curriculum vitee and names of 3 referees by airmail quoting reference FLIP/2/85 to:

Personnel Officer **ICARDA** P.O. Box 5466 Aleppo, Syria.

Applications should be received by September 30, 1985.

Bollar Lower in New York, Up in Europe

Compiled by Our Staff From Disputches NEW YORK - The dollar drifted lower in New York on Friday, ending the week with a bearish sentiment

The dollar was higher in Europe, reflecting Thursday's rebound in U.S. trading. There was a downward bias throughout the day in New York, although the dollar held

above key support levels.

The pound closed in New York at \$1.405, up from \$1.398 Thursday. Other closing dollar rates in New York: 2.75 Deutsche marks. down from 2.764; 8.3975 French macs, down from 8.44, and 2.25 Swiss francs, down from 2.264.

"It was a typical August Friday," said Elaine Lloyd, an analyst at Irving Trust. "The market didn't get anything in the way of new direction."

She also suggested that New York's trading may have been af-fected by London's activity, which slowed as many dealers went home

early for a long weekend. British in the near term to push it higher."

In Europe, the dollar rose in qui-

Alberta's Energy Industry Revives

make the purchase.

By Fred Langan ternational Herald Tribune

RED DEER, Alberta - A new federal government energy policy and a rush to take advantage of expiring incentive grants and tax laws has Alberta's sluggish economy moving again.

Alberta is Canada's major oil and gas province, but falling world oil prices and a discarded federal energy policy have meant no growth, on an inflation-adjusted basis, in Alberta for the past three

Industry sources trace the roots of the province's problems largely to the National Energy Policy, or NEP, a program announced in the fall of 1980 by the Liberal government of former Prime Minister

Pierre-Elliott Trudeau. The NEP was designed to bring a greater part of the oil and gas in-dustry under Canadian control. Many of its provisions favored Canadian companies while penalizing foreign, especially American, oil

The result was that many foreign oil companies sharply reduced their drilling activity. Alberta's oil industry, already faced with declining oil prices, went from boom to

It is is easy to see that is chang-ing. Oil rigs are going up inside Red Deer's city limits for the first time, while west of the city, drilling activity has picked up a pace not seen in

The economics of drilling for oil has never been better," says Robert Price, an analyst with Peters & Co., a Calgary-based broker-age house that specializes in energy

Two features that make drilling attractive are the reduction of royalties -in 1982 and again this past June - along with the phasing out of a 12-percent petroleum-and-gas revenue tax. The tax, implemented by the Liberals in 1981, is expected

to be abolished by 1989. Dome Petroleum Ltd. is one of the big operators in the area around Red Deer. The oil and gas are easy to exploit here and are close to pipelines connecting markets in the United States and Canada.

Red Deer is also the scene of Dome's comeback from near collapse. A debt-refinancing package, sponsored by the Canadian government and several commercial banks, rescued Dome from bank-

ruptcy proceedings in late 1982. to Mr. Price, are the move to world oil prices - the NEP had a two-Dome's troubles with long-term debt snowballed after the company tiered pricing system that paid had acquired in March 1981 Hud-son Bay Oil & Gas Co. for \$4.1 billion, borrowing \$4.5 billion to world prices for newly discovered oil but lower prices for oil already

Calgary-based Dome appears to have made a turnaround along with the rest of the Alberta economy. For this year's second quarter, the company reported a profit of 2 million Canadian dollars, compared with a loss of 61 million Candian dollars a year earlier and a loss of 23 million Canadian dollars in the first quarter. It was the first profit

since the third quarter of 1983. Dome had a record loss of 1.1 billion Canadian dollars in 1983, trimming that deficit to 197 million last year.

The new conservative government in Ottawa re-wrote the rules of the oil game this year. Ottawa has made it easier for foreigners to invest in Canadian oil and gas ventures, and has lifted restrictions on exporting oil to the United States.

other key measures, according all yours," said Mr. Hallisey.

payments by the government has made the U.S. budget situation worse. The huge budget deficit has caused the United States to borrow heavily from Japan, making the dollar exchange rate unrealistically high. This has caused unprecedented problems for American manu-

acturers and exporters.

It is true that today's trade crisis is a result of close interaction between the two economies. But an attempt to reduce the degree of interdependence would hurt both countries severely. Each needs the other if it is to have sustained

growth and low inflation. It is important to recognize that macroeconomic policies are not churned out to order by economic technocrats. They are the result of a mixture of political thoughts, value premises and social traditions as well as of economic analysis. International implications are a factor but not necessarily the determining

factor in the policy-making pro-To bring economic policies in the two countries into greater harmo-

in the ground - along with a oneyear holiday on Province of Alberta royalties on new discoveries. The Canadian Petroleum Association estimates that oil companies

will spend 20 percent more than they did last year. In 1984, spending came to a record 7.2 billion Canadian dollars. Richard Hallisey, analyst at the

Toronto offices of First Marathon Securities, takes a more cynical view about Alberta's turnaround. "Sure, there's a stocking of drilling activity, but that's because companies want to get PIP grants

before they run out in March of next year," he said. PIP is short for Petroleum Incen-

BUSINESS PEOPLE

Investment Banker Uses Tough Tactics for Unions

New York Times Service NEW YORK - When Brian M. Freeman, an investment banker, is negotiating, he bluffs, he demands and, very calculatingly, he sometimes insults his adversary to gain the upper hand.

The clients he so tenaciously represents, however, are neither deep-pocket takeover artists nor multimillion-dollar corporations. Instead, they are labor unions whose members may be willing to make wage concessions in return for profit-sharing and stock owner-

Often in troubled company situations, the unions hold the key to either attracting an outside investor tive Programs, a government pro-gram that subsidizes 35 percent of for an acquisition or accomplishing the cost of drilling an exploratory a turnaround for existing management. Mr. Freeman views his role as that of getting the message across to them that the wage concessions of unions are "no different than making a capital investment in a company.

For giant corporations those concessions can amount to \$100 million and more a year. Using them as a bargaining chip is what Mr. Freeman refers to as "the exer-

cise of economic power." Mr. Freeman is one of only a few views on the political and economic considerations affecting each counbanking. As president of Freeman & Co., a small Washington-based financial advisory firm, he currently is representing, along with La-zard Frères & Co., the unions of

Trans World Airlines. The three unions, machinists, pilots and flight attendants, have aligned themselves with Carl C. Icahn, the investor who is making an apparently successful takeover bid for the airline.

For four years, Mr. Freeman also has been the adviser to the 17 unions of Consolidated Rail Corp. the government-owned line that is

up for sale. The committee said that a some-what easile credit stance might be much as \$4 million in fees for help-crived a law degree and a master's acceptable in the event of substan-ing the unions, among other things, tially slower money growth, but to receive a giant payback of their seems likely, his firm and Lazard

Brian M. Freeman

Frères could split a \$2.5-million

Most union leaders who have worked with Mr. Freeman say he is worth the price.

"We can negotiate wages, hours and working conditions," said John Peterpaul, a vice president of the International Association of Machinists and Aerospace Workers. But when we play around in the financial world, we need someone like Brian Freeman. He fills a lot of

Known as a workaholic, the 5foot-7-inch tall, 39-year-old Mr. Freeman is routinely juggling several union negotiations at once. The last time he had a vacation with his wife and three children, he said, was a week at the New Jersey shore two years ago. A union leader referred to him as a "whirling dervish; he'll hang in there on week-ends, through all-night sessions and keep coming back for more."

To be sure, Mr. Freeman has his

detractors. His candid, brash personality offends some, as does his tendency to take charge of negotia-

Robert Callahan, president of Eastern Airlines Local 553 of the Transport Workers Union, described Mr. Freeman as "tough smart—a street punk with a PhD." He added that "his fearless edge Once the Conrail sale goes has not been blunted by his aca-Harvard before working at a New York law firm and holding a research appointment at Harvard's Graduate School of Business.

THE ILLUSTRATED ZULEIKA DOB-

By Max Beerbohm. With 80 illustrations by the

author. Introduction by N. John Hall. 350 pages.

Yale University Press, 302 Temple Street, New

EXCUSE all this to-do," said Max Beerbohm, explaining why he was so upset with typographical mistakes in the first printing of his novel

Zulcika Dobson." "If one is writing a history of civilisation or propounding some great new gospel

printers' errors do not matter - they even brighten

A savvy literary critic, as well as a confirmed

aesthete, Beerbohm was never one to overestimate

his glittering but minor talents, and in the case of

"Zuleika Dobson" his self-assessment was remarkably astute: His only novel, originally issued in 1911, is indeed a trifle, but a perfectly delightful one

- all style and wit, a pretty fantasy served up in

A satire on university life, aristocratic manners

and the literature of Tragedy and Romantic Love,

"Zuleika Dobson" recounts the whimsical and quite

thoroughly preposterous tale of a beautiful showgirl

- "the toast of two hemispheres" and "a nymph to

whom men's admiration was the greater part of life"

a thing up. But a trifle must be perfect."

exquisite, ornamented prose.

- who takes Oxford by storm. The Duke of Dorset,

a committed dandy who has vowed never to com-

promise his pristine self-adoration by falling in love

with someone else, tumbles for her charms, as do all

the other undergraduates at Oxford. When they

discover that their love is to remain forever unre-quited, they eagerly race to the river to drown themselves in its shallow waters. "From the towing-

path - no more din there now, but great single cries of 'Zuleika!' - leapt figures innumerable through rain to river." "Abominable, yes, to them who

discerned there death only; but sacramental and

sweet enough to the men who were dying there for

charming satirists, Beerbohm was a well-known

artist, and he put his gifts as a caricaturist to use with "Zuleika Dobson," illustrating his own copy of

the novel with about 80 watercolor sketches. Until

now, those drawings have been unavailable to most

of his readers; convinced that illustrations were

superfluous in a good novel, Beerbohm refrained from publishing them during his lifetime. "If I cannot see the characters in a novel," he once wrote,

then they are not worth seeing. If I can see them

then any other man's definite presentment of them

seems to me an act of impertinence to myself and of

Besides being one of fin de siècle England's most

love. Any face that rose was smiling

impicty to the author."

Although Beerbohm's meticulous attention to soand the text in a recognizable reality, it remains a reality brilliantly heightened by his impish imagina-tion. In the Oxford of "Zuleika Dobson," students

A good number of the drawings chronicle central events in the novel (Zuleika's arrival in Oxford, the duke's plunge to a watery death), but many others are devoted to minor personages and to fantasies entertained by various characters — the duke's imagining, for instance, that Byron would have magning, for instance, that byton would have grown to be "a florid old gentleman with iron-grey whiskers, writing very long, very able letters to "The Times." "Eight of the drawings depict Beerbohm as the dapper narrator of "Zuleika," mixing up real people and phony ones at will and leading Melpomene, a most befuldled muse of Tragedy, on a merry chase through history.

N. John Hall, this edition of "Zuleika Dobson" is delicately produced, attentive to textual and visual detail. It is a book that would have doubtless

Michiko Kakutani is on the staff of The New York

As this elegant volume from Yale University Press attests, however, Beerbohm's drawings amphfy, rather than diminish, his accomplishment. Like l'enniel's illustrations to "Alice in Wonderland," like Cruikshank's to "Oliver Twist," these sketches contribute to the story a new and pleasing dimension, so gracefully do they complement the qualities of the text. Beerbohm's drawings possess the same qualities as his prose: Both are fanciful in conception and stylized in execution, the swift edge of their

hyperbole moderated by the author's evident affec-tion for the objects of his satire. cial and sarrorial detail grounds both the drawings spend a lot of time worrying about love and their social standing, and they hold plenty of earnest discussions about the virtues of Beauty and Truth. But in this fictional Oxford, statues literally weep with fear, the gods shake their fists and grimace at the follies of men, and people generally behave like

Freudian case studies in extremis.

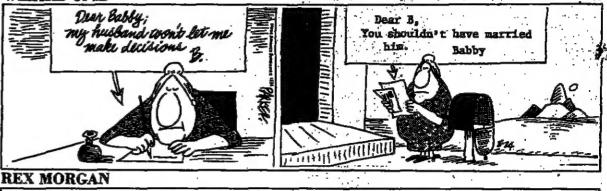

AMSTERDAM — The Concertgebouw Orchestra, under Bernhard Haitink, will begin a 17-concert tour Sept. 10 that will include Buenos Aires, Rio de Janeiro, São Paolo, Los Angeles, Ann Arbor (Michigan), Toronto, Boston, New York and Washington.

U.S. Captures Walker Cup

By Gordon S. White Jr. New York Times Service

CLEMENTON, New Jersey — Scott Verplank, the reigning United States amateur
champion, nailed down a U.S. Walker Cup
victory over the team from Britain and Ireland here Thursday when he edged Colin Montgo-merie of Scotland, I-up, at the 6,691-yard, par-70, Pine Valley Golf Club.

The triumph came when Montgomerie

24-point competition.

Seconds before, Bob Lewis of the U.S. team shoved to 3-up with three holes to play against Cecil Bloice of England, assuring the hosts of another half point and the overall victory. Lewis won his match, 4-and-3, to make the final score

The score had been tied at 6-6 after the first day's matches of four foursomes and eight sin-

day's matches of four foursomes and eight singles on Wednesday.

Earlier Thursday, the Americans had broken the tie and moved into position for the triumph against an unexpectedly strong British-Irish squad when they won three morning foursome matches and halved the other.

That was needed because in the eight afternoon singles matches, worth one point each, the visitors won four and halved one in what was a far closer Walker Cup test than had been antici-

I was more nervous on the last two holes today than in the Western Open," said Ver-slank, who shot a one-under-par 69 on Thurs-day to Montgomerie's 70. "Maybe that's because this was not just for me, but for the team and country.

Verplank became the first amateur to win a

Verplank came out of a greenside bunker to save a par-5 on the 15th hole and go to 1-up over Montgomerie, the Scotsman who is a student at Houston Baptist University in Texas, where he plays on the golf team. They halved the final three holes all parale.

Following Wednesday's heavy rains and sog-gy play. Thursday's matches were played in cloudy but comfortable weather.

In the morning foursome matches, Britain-Ireland earned only half a point, when the team of Paul Mayo and Montgomeric battled Verplank and Jay Sigel on even terms. The 22-yearold Mayo dropped a slippery, 20-foot downhill puts on the 18th for a birdie 3 that enabled that missed a 12-foot birdie putt on the 18th hole and increased the official U.S. point total to 12 in the ever led by more than a hole and each team held ever led by more than a hole each team held ever led by more than a hole each team held ever led by more than a hole each team held ever led by more than a hole each team held ever led by more than a hole each team

a I-up advantage on three occasions.

The result of the morning play was that the Americans went to the hunch break with a 9%-61/2 lead. That put them in a comfortable position, needing only 3 points out of the eight afternoon singles matches to win the cup.

The victory was the 27th for the United States in the history of these biennial competitions, which were first held at the National Golf Links

on Long Island in 1922.

Sigel, a two-time winner of the U.S. amateur title, and Verplank, the 1984 U.S. amateur mpion, went to the 17th tee even with Mayo and Montgomerie. Verplank hit his drive into the middle of the landing area about 120 yards

from the 17th pin.
Sigel then hit the approach over the scrub pine and sand between the fairway and the small, elevated green; the ball stopped, below the hole, 12 feet from the pin. After the Mayo-Montgomerie team completed its par, Verplank sank the putt for birdie 3 and a 1-up advantage. The Americans needed only to halve the 18th for a sweep of the morning foursomes.

But after Sigel drove down the middle, Ver-plank pulled his approach iron to the back Verplank became the first amateur to win a pro tournament in 29 years by taking the recent but then Mayo dropped the birdie putt that

teur champion, played on seven Walker Cup world's third-ranked women play-teams and earned 12 points. Bobby Jones and Francis Onimet each scored nine points in their Riggs said he is not worried lifetime for U.S. teams.

No member of a British-Irish team has ever earned more than eight points.

Riggs, at 67, Parlays the Same Old Hustle

called the hustle, there was Bobby over the years and I believe he's just Riggs, one of the greatest hustlers as good now as when he did so well

Riggs was to do his thing here Friday night by combining with Vitas Gerulaitis in a five-set, \$500,000 challenge match against Martina Navratilova and Pam Shriver, the world's No. 1 women's doubles team. The winners will plit \$300,000 and the losers \$200,000

Riggs, 67, said it was to be a test of ability. "I only deal with things that involve skill. A hostle implies that the result is known in advance, that you set it up. I don't do that." But he added: "Imagine an over-

the-hill codger getting somebody to pay half a million dollars to watch me in a doubles match with a couple of gals. This is going to be my annuity. Every year I'll get a partner to help me challenge the best women's team, It'll be like a TV

Navratilova and Shriver, favored 9-5 by Las Vegas oddsmakers, had won 109 straight doubles matches and eight grand slam titles before losing to Elizabeth Smylie and Kathy Jordan in the final at Wimbledon this year.

As of week ago, Shriver and Navratilova had not played together in a tournament since Wimble-Jay Sigel: New standard for cup points.

don. "But I don't imagine it's going to take us long to get used to each other," said Shriver, 23 and the

> Riggs said he is not worried about meeting Shriver and partner Navratilova, the 29-year-old who has dominated women's tennis

Joe Montana, the San Francisco 49er quarterback, will probably miss the exhibition game Saturday against San Diego because of a sore back that has been bothering him throughout training camp. Bill Walsh, the 49er coach, said the injury might be severe enough to keep him out of a regular-season his rookie season in 1983.

With John Hannah and Brian Holloway injured, the New England Patriots plan to shuffle their ffensive line for Friday night's exhibition game against Washington. Hannah, an all-pro, is out at left guard with a strained calf muscle. Holloway has a bad back. Coach Raymond Berry will move center Guy Morris into Hannah's spot at left guard, with Pete Brock going to center; Paul Fairchild will play for Holloway. Steve Moore will fill in again for Darryl Haley, a tackle who was injured earlier.

• In their 23-17 loss to the Atlanta Falcons Saturday night, the Tampa Bay Buccaneers did something they'd never done before — they blocked a punt. Ervin Randle, a rookie linebacker from Baylor, batted down the ball, which was picked up by Mark Witte, who returned it 13 yards for a touchdown.

 Ron Meyer, who was dismissed as the New England Patriots' coach midway through last season, is now working as a player agent in Dallas, and his best-known client in footchanging its vote to notify the league. Rozelle said Thursday that "a couple of clubs have called," but ball is Craig James, a Patriots running back. James's current contract not enough to warrant a special has several more years to run, but Meyer said, "I can't wait to negotiate a new one."

LOURDES POSTCARD

No Room for a Tavern?

By Richard Bernstein New York Times Service

T OURDES, France - The souvenir shops in this sainted city of pilgrims - shops that have names like Our Lady of Perpetual Aid — offer for sale an array of flickering plastic objects that fall short of high art. The shops reflect the dominant tone of Lourdes, where about 45,000 of the faithful come every day to visit the holiest Roman Catholic site in France.

Every afternoon a colorful pro-cession of visitors, many disabled or sick and wheeled on stretcher beds, or pulled along by volunteers in blue canopied carriages, makes its way past the grotto where the Virgin Mary is believed to have appeared to St. Bernadette in 1858. The procession then goes on to the great esplanade in front of the Basilica of the Immaculate Conception for the celebration of a multilingual Mass. All the visitors are drawn by their faith in the miraculous cures attributed to the waters

August, the month of vacations in Europe, is a seasonal high point for Lourdes, in southwest France; after Paris, Lourdes has the largest number of hotels of any city in

This month, an uncharacteristic note of contention has interrupted the solemn routines of Lourdes. The note was struck by François Abadie, mayor of Lourdes, who appeared on television one recent day to declare, "Lourdes is not a sailors' port of call like Toulon."

What Abadie was talking about is a kind of clash of values and moods between the city's character as a holy place, and a small nightspot in a soundproof basement of the Burgundy and Brittany Hotel, a place with a bar and a jukebox and

a tiny dance floor. The bar was opened a couple of months ago by Jean-Pierre Garuet, who owns the Burgundy and Brittany and a man whom the local press calls "the pillar" of the

French national rugby team. Garuet's bar has become one of those little things that grow imper-

ceptibly larger It happened this way: On Aug. 1, with the summer season about to peak, the bishop of Lourdes, Henri Donze, wrote a letter, which was reprinted in a local newspaper. The letter called on all people to respect the sanctity of Lourdes's holy sites.

The bishop's main concern was for proper dress, since everybody in Lourdes had noticed skimpily clad young people, often on camping trips in the surrounding Pyrénées,

visiting the city. The bishop also wrote that "in certain hotels, the holding of parties and even nighttime dances. drinking and noisy revelry, raise a lively condemnation."

His letter did not specifically mention Garuet's little bar or any other of the handful of similar places in Lourdes. But word soon went out that the place at the Burgundy and Brittany was what the bishop had in mind.

A journalist from the French sports daily L'Equipe was apparently the first to mention Garnet by name in connection with the bishop's letter. The story was picked up by the national leftist daily Liberation and, on the right, by Le Quoti-dien de Paris. Crews from two of France's three television stations appeared at Garuet's hotel to film and interview the rugby star.

Explanations vary over how the "piano bar affair," as it is being called (even though there is no piano in Garuet's bar), became a big deal. "The nights are long, people are far from their homes," said the Reverend Fernand Barraqué, the deputy rector of Lourdes's sanctuary. "Lourdes is one of the most anonymous cities in France, because you can be completely alone here. It's a place where most of the population at any given time changes completely every four or

The clear concern of some local clergy was the prospect that bars like Garuet's would become opening wedges toward public drunkenness, noisy nightspots in a quiet

Although they say a nightclub is not appropriate for a city of religious visitors, some religious leaders are surprised that so much has been made of so little, and disturbed that one result may be to make the church authorities appear

rigid, opposed to fun.

The French press has quoted some religious authorities as saying that Lourdes may be a sainted city. but it is not a city of saints. It is a truism that seems to provoke some delight in Lourdes.

Art Buchwald is on vacation,

The Dean of China Studies: Frisbees and a Fake Beard

By Jay Mathews Washington Post Service

WAS a sophomore at Harvard, newly transferred from a small California college because I had discovered I was in love with China, John King Fairbank was the dean of China studies, tall, lean, bald, usually expressionless, save for a slight smirk when listening to something he considered unusually funny or ri-

He had come out of South Dakota in the 1920s like an intellectual tornado, taking a summa in history, winning a Rhodes schol-arship, marrying the brilliant daughter of a famous Harvard Medical School professor, spend-ing years of adventure in China, defying the McCarthyites, then polishing off the legend by creat-ing the postwar China studies in-

It was intimidating to see him standing before the 100 or so of us crammed into Soc, Sci. III (East Asian History, usually called "Rice Paddies"), celebrating the sweep of the Chinese cultural re (in which he thoughtfully included Japan) and demanding thought and synthesis and meaning from a confusing montage of Asian faces and strange trisyllabic names.

In many cases a name and legend seem to leave little room for the shy and the uncertain, but John Fairbank knew that, and spent much of his time throwing down lines to us small fry.

There was, for example, his house, a shaky little yellow-frame three-story model amid a jungle of tall dorms and university offices. There was barely enough room inside to move around during his regular Thursday afternoon teas.

The impression that Professor Fairbank was not a man to put on airs was fortified by his habit of appearing at darkened theaters with a flashlight in his pocket, to make sure his targe and ungainly feet did not tread on any toes. He also liked to throw Frisbees in his front yard, a practice I could not square with my image of the man writing those pieces in the New York Review of Books.

Then there was Wilma, Mrs. Fairbank. She was the eldest of four sisters of the celebrated Cannon family, a magna graduate in fine arts whose husband envied her "creative capacity for spontaneous play, thought and action."
This was fortunate, since her husband was the sort who rhapsodized about Sundays locked in the stacks of Widener Library: "Free for the day — no people, no phones, a sandwich, and the quiet

of a Trappist monastery."
The Fairbank genius, I gradually learned, was to mix rigor and sweat with a great deal of fun. It was not something I expected, with a Westerner's view of Harvard as a very serious place, but it had an enormous appeal. In his autobiography, "Chinabound: A Fifty-Year Memoir," Fairbank notes that his conquest of Exeter, Harvard and Oxford came through a similar formula: Spend the first year with the books, then

get to know the people.

His forbidding appearance and his ultra-dry academic specialty. Qing dynasty diplomatic papers, his jokes that much more punch. You did not expect to see him don a long Confucious-style beard at the faculty-student party, nor did you expect the wellrawn quips in nearly everything

On how to survive academic skirmishes: "I was already learning how to be a sinologist when among historians and, with a slight shift of gears, a historian when among sinologists - much like a Chinese bandit who is never caught because he stays on the border between provinces and when pursued from one side quietly fades across into the other

On Shirley MacLaine, seated to his right at a White House dinner: "She had acquired China by leading a menagerie of American women, one of every known kind. on a culture-shock trip to the PRC that simply beat the pants off any other culture shock she had ever had."

On his 1979 coronary: "A non-fatal heart attack is, I am sure, much more interesting than the

for his popular works, foremost among them the much-reissued "United States and China." Even at personal moments he loves to history. One of his letters to me in Vietnam wondered if Western civilization could survive "with this much firepower."

مواقع بداره بهر السيدية في المواقع بين المواقع بداره بهر المواقع المو

His memoir speaks most glowingly of one of his most narrow projects, however — "Modern China: A Bibliographical Guide to Chinese Works 1898-1937." Few hardy souls have read through this 608-page tome, coauthored with K.C. Liu. "I still get excited reading this volume," Fairbank said. "As long as I had it at hand I could give any student the knowledge of Chinese sources that he ought to have and show

days, required enormous energy and persistence. Even in Fairbank's underplayed manner, his outrage at the blow to civil liberties and intellectual freedom from the McCarthy and McCarran hearings was palpable. But I sense he was at least as distressed because McCarthy and company were wasting his time, and the time of a lot of other people.

Plotting his conquest of Exeter at age 16, he decided that "we all started equal in having 24 hours a day." The game went to whomever used this time best. Fairbank watchers ever since have noticed the great man clipping his nails during tutorials, shaving while on the telephone. A seminar that degenerated into a bull session grated on him like fingernails on a blackboard. At each session a student paper had to be read and criticized; no straying from the

His heart attack occurred while he was in his office on a Thanksgiving morning two years after his "retirement"; he was trying to get in some work on his several book projects before dinner.

projects before dinner.

As East Asian area studies developed in the 1950s and 1960s,
ter, no one could outdo him. One
two of which are in preparation;
and he has just sent his "Revolution in China" to Harper & Row.

Scholar Fairbank: "Much like a Chinese bandit."

To galvanize an entire area of and his students began to fan out of his best came after the heart academic study, and take it around the country, Fairbank attack On his arrival at Mt. Authrough the difficult McCarthy made sure they were not wasting burn Hospital in an ambulance, made sure they were not wasting their time, either. He waged war against something he called "manuscript retention," a postgraduate's insecure resistance to offering work for publication. When David Roy, now professor of Chinese literature at the University of Chicago, was a "tenacious young instructor" at Princeton University, Fairbank asked to see his manuscript, then "picked it up and got out the door with it. "The skill of the Mt. Auburn It made a good book and helped

his career. When promising historians occasionally veered away from aca-demia, Fairbank could be heard to complain. He was still ragging Fox Butterfield for not finishing his doctoral thesis years after Butterfield had become a foreign correspondent for The New York Times. But those who strayed knew this was mostly a joke. We extended his empire to the mass

The point, he made clear, was to communicate. Stay in touch with your students, your professors, your readers, your friends, just as he does at age 78. The truth will never emerge unless we all

Test-Tube Quadruplets For 70-Year-Old's Wife

A 70-year-old man and his 38year-old wife are expected to become the parents of test-tube quadruplets next month, Hammersmith Hospital in London, one of Britain's leading centers of infertility treatment, confirmed Friday, A hospital statement said that Doris del Renzio "and the babies are very well" but that she was staying in the hospital as a precantionary measure. The statement followed a front-page story in The Times of London and an interview in which Tori del Renzio, a retired art director for Italian magazines, films and television, said: "I must admit I would have been happier if we had been able to have just one baby." Del Renzio and his German-born wife of 14 years live in Kent.

Concertgoers waiting to hear Woody Herman and George Benson at an International Jazz Hall of Fame induction awards ceremony in Kansas City, Missouri, had to wait about an hour and a half because paychecks for musicians and technical crews were misplaced. About 500 people waited while the checks were sought. Finally inducted into the Hall of Fame were Jo Jones, Max Roach, Roy Eldridge, Dizzy Gillespie, Clark Terry, Elle-Fitzgerald, Herman and his orches. tra, and some members of the Count Basie Orchestra

Beijing residents have been flocking to hear and buy Western music from Beethoven to Boy George at the first exhibition staged in China by Western record companies. Most of the recordings on exhibit are budget classical tapes, but popular sounds from the West and from Hong Kong attract-ed more attention from the predominantly young visitors.
"There's a lot of interest when we show music videos," said David Tang, representative of Virgin Re-cords, whose artists include Boy George and Julian Lennon. "People are interested by Boy George's androgynous look. He looks similar. to one of the standard characters us. Peking Opera." Yan Ronsind, 2 17-year-old art student checking out Virgin tapes, said: "Young peo ple in China today aren't much interested in light music. We want something with a beat to it, music with a bit of feeling."
